Marine Biology & Oceanography covers a wide range of topics, including marine organisms, ecosystem dynamics, ocean currents, waves, geophysical fluid dynamics, plate tectonics, geology of the sea floor, fluxes of various chemical substances and physical properties within the ocean and across its boundaries. The Journal of Marine Biology & Oceanography (JMBO) promotes rigorous research that makes a significant contribution in advancing knowledge for marine sciences. JMBO includes all major themes pertaining to organisms in the ocean or other marine or brackish water bodies.

Journal of Marine Biology & Oceanography uses online manuscript submission, review and tracking systems of SciTechnol for quality and quick review processing. Submit your manuscript at <http://www.scitechnol.com/submission/>
