Molecular Medicine & Therapeutics is an international, peer-reviewed journal, providing original research information and latest breakthroughs in the field of Molecular Medicine. The Journal Molecular Medicine & Therapeutics (MMT) includes basic research aimed at understanding molecular mechanisms of disease, as well as translational research utilizing this information to develop new and improved molecular-targeted approaches for prevention, diagnosis, and therapy. The journal covers all aspects of molecular biology, pathophysiology and molecular therapeutics.

Molecular Medicine & Therapeutics uses online manuscript submission, review and tracking systems of SciTechnol for quality and quick review processing. Submit your manuscript at <http://www.scitechnol.com/submission/>
