**Marc Weinberg, PhD**

University of the Witwatersrand, South Africa

Virology is the study of viruses and virus-like agents: their structure, classification and evolution, their ways to infect and exploit host cells for virus reproduction, their interaction with host organism physiology and immunity, the diseases they cause, the techniques to isolate and culture them, and their use in research and therapy. The Journal of Virology & Antiviral Research (JVA) promotes rigorous research that makes a significant contribution in advancing knowledge for Molecular Medicine and Microbiology. The journal includes all major themes pertaining to viral diseases and treatment.

Virology & Antiviral Research uses online manuscript submission, review and tracking systems of SciTechnol for quality and quick review processing. Submit your manuscript at <http://www.scitechnol.com/submission/>
