Regenerative medicine refers to the growing cells and tissues used for the replacement or regeneration of damaged tissues or organs of the body. Journal of Regenerative Medicine focuses on tissue engineering, stem cell research, stem cell based therapy, cell transplantation, artificial cells and organs.

The Journal of Regenerative Medicine (JRGM) promotes rigorous research that makes a significant contribution in advancing knowledge for developing new therapeutic approaches to prevent and treat life-threatening diseases.

The goal of Regenerative Medicine is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of the field by publishing all the latest and outstanding research articles, reviews and letters in all areas.

Journal of Regenerative Medicine is using online manuscript submission, review and tracking systems of SciTechnol for quality and quick review processing. Submit your manuscript at <http://www.scitechnol.com/submission/>
