Biodiversity deals with the degree of variations in life forms of an ecosystem and the management criteria for the conservation of species, restoration of plants and animals including conserving the forests for the sake of living organisms in socially accepted way. The Journal of Biodiversity Management & Forestry (JBMF) promotes rigorous research that makes a significant contribution in advancing knowledge for biodiversity and its conservation. The JBMF includes all major themes pertaining to biodiversity management criteria for the conservation of species.

Journal of Biodiversity Management & Forestry uses online manuscript submission, review and tracking systems of SciTechnol for quality and quick review processing. Submit your manuscript at http://www.scitechnol.com/submission/
