Journal of Sleep Disorder, Treatment and Care, JSDTC is very important journal focused on current development in sleep issues for human health. Studying of fetal alcohol syndrome disorders (FASD) and knowing how important are sleep health issues for children diagnosed with FASD, I appreciate highly focused articles in journals like JSDTC. I highly recommend publication in this Journal. The entire submission, review and publication process for the journal are easy and quick, and the quality of the reports are excellent and helpful.
