Orbital Inflammation - The myths and the facts

Orbital inflammation is an important, yet often misdiagnosed and mismanaged clinical condition. A delayed diagnosis or inappropriate treatment could have a long lasting impact on an individual's vision. In this keynote address the author dispells various common myths about orbital inflammation and explains simple facts about the condition with the help of a number of clinical case presentations. The role of imaging and some other special onvestigations is also discussed.

Biography

Ajay Tripathi did his masters in Ophthalmology in India and then completed fellowships in Ophthalmology from The Royal College of Physicians and Surgeons of Glasgow, The Royal College of Surgeons Edinburgh and The Royal College of Ophthalmologists, London. He completed his super speciality fellowships in lid, lacrimal and orbital surgery from University of Leicester and Cambridge University UK.
