

5<sup>th</sup> International Conference on

# OTORHINOLARYNGOLOGY

August 07-08, 2017 London, UK

## *Mohammed A Gomaa*

*Minia University, Egypt*

### **HPV and laryngeal cancer in Egypt**

Human papilloma viruses (HPV) are clearly the etiologic agent of benign lesions of the head and neck, and some of those lesions can undergo malignant conversion. The viral role in laryngeal carcinoma has been studied, with conflicting results according to the population and methodology used. The talk will reveal: The prevalence of HPV in Arab countries and worldwide; the difference between HPV in oropharyngeal and laryngeal carcinoma; our experience with HPV in cancer larynx and; the relation between HPV with tumor size and nodal metastasis
