TRADITIONAL & ALTERNATIVE MEDICINE
&
International Conference on
ACUPUNCTURE AND MERIDIAN STUDIES

April 23-24, 2019 | Rome, Italy

Alex da Silva Santos

ABRATEB Association, Brazil

The definitive healing of fears through the radionics crystals

Through a theoretical and practical presentation, I will present the Radionic Crystals and explore their various therapeutic possibilities, giving emphasis to the definitive cure of the fears. Through the Radionic Crystals we treat countless pathologies, be they of physical or emotional origin and we are able to eliminate specific fears in few minutes, no matter how long the person suffers from fear or if he has been doing treatments for years to get rid of it. The results are always immediate! There is no technique in the world that has such power. The Radionic Crystals were created in 2008 by the acupuncturist and dowser, Prof. Raul Breves, and are considered by many, the most important world

discovery in the field of acupuncture. They are small glass spheres, similar to those used in auriculotherapy, with the difference that they are programmed with a powerful energy that immediately changes the mental pattern and the energy of the point or region where they are placed. The application is totally painless and the results are incredibly fast. Its programming is entirely based on Chinese medicine, which also allows us to use them to replace needles in the vast majority of acupuncture treatments, facilitating and enhancing the results of the treatments performed. An indispensable tool for Acupuncturists and health professionals all over the world.

Biography

Alex da Silva Santos is acupuncturist for 30 years. He is director of the Brazilian Center for Clinical Acupuncture and Chinese Medicine, coordinator and professor of the acupuncture course of the Faculty of Sciences of Wenceslau Bras, (FACIBRA)-Parana-RJ. He started the work with the Radionic Crystals in 2008, along with his creator (Prof. Raul Breves), forming in Rio de Janeiro, the main pole of vocational training in the therapy of radionic crystals in Brazil. In 2008, he was elected vice-president and director of teaching of ABRATEB (association that regulates the teaching and practice of the therapy of radionics crystals in Brazil and in the world). He recently moved to Portugal to introduce the radionics crystals in Europe, where he has already taught several training courses in partnership with the Instituto VanNghi de Portugal.
