

## Quantum medicine, new approach to health Tesla scalar vibrational medicine as separate entity

**Katarina M Kuzmanovic**

Institute for healthcare of workers on Serbian railways, Serbia

Quantum medicine is a new branch of medicine. It is not dependent only of our will, choice or level of education and spirituality but of the main path that science is going. It is present almost 40 years in the society as a "borderline science" but today has many users and might be important part of the primary healthcare. It is no anymore about "tomorrow" but about "today" and "now". Developing of Quantum physics provided many tools that can be used in medicine without any side effects. It is strongly generated with traditional medicine, acupuncture, Ayurveda, herbal medicine, yoga, ...In this sense medicine is divided today on the one that is based on the quantum mechanics and the one that is based on quantum physics. After exploring many softwares for quantum medicine healings including (Bicom optima, e-Lybra system, Diacom NLS system, Veda pulse

diagnostics, Rife generators, Zappers, Analysers of quantum fields of human body I came to conclusion that Tesla scalar field has the perfect influence on the human bio-field. This is non-Hertz wave with greater speed than light made by Nikola Tesla in his patents but also present in the nature. This has a perfect influence on the DNA regulation and reparations on the cellular level but with a big influence on the <Ethereic body that alternative medicine is interested for as well. Regulation is coming from the TOP TO BELOWE from the etheric body where the problem has started, before its material signs. We came to idea how we may use this invention in prevention .It is not that much new if we reconsider that Tesla was member of American therapeutic association from 1903 and now is 2019. He was advanced more than 100 years from his time.

### Biography

Katarina M Kuzmanovic medical doctor, graduated in Medical Faculty University of Belgrade in the year 2010. In the year 2012 graduated School of Traditional medicine and Acupuncture, European center for Peace and Development in Belgrade.
