EARTH SCIENCE AND CLIMATE CHANGE

September 06-07, 2018 | Zurich, Switzerland

Air conditioning the mother earth

Raveendran Narayanan

Hentry George School of Economics, USA

Seawater desalination is frequently referred to as a drought proof water supply. Seawater desalination is good for the Middle East States, but very bad for the other parts of the World. Concentrated Brine, Millions of tons of Bio-Hazard cleaning chemicals and many types of bacteria from Heavy Duty Seawater desalination plants already dumped and continuously dumping in to Mediterranean, Red Sea, Arabian Gulf and Indian Ocean since 1974. As Indian Ocean is extended to Atlantic Ocean and Pacific Ocean, the damages are there also. Middle East's climatic conditions accelerate the vigorous growth of many types of unicellular organisms and bacteria. Its results are: - the flora & fauna are becoming whitish colour and dying. Publishing Environmental problems and its remedies in World

Congresses on water is not a crime in this environmentally damaged World. A group of giant corporations including their cronies, corrupted anti human & anti-social officials and then U.A.E. Foreign Minister with the support of US officials and Former UN Secretary General are embittering the life of a human person since 1997. Global climatic calamities could have been averted. Potential loss of bio diversity is permanent. Golden ceremonial swords given by U.A.E. royal family played a great roll in these global calamities. Environmental catastrophe now a days happening in the World is due to long term Environmental rape by Middle East States. With limited resources available, the scientific evidences collected will prove the situations and will provide the remedies.

Biography
