Dubai, UAE

Syed Iftikhar Hussain Shah

Addis Pharmaceutical, Ethiopia

To maximize the professional contribution and excellence of Pharmacists, thus ensuring optimum health outcomes

I, Syed Iftikhar Hussain Shah from ISLAMIC REPUBLIC OF PAKISTAN welcome you in the opening session of 03rd International conference on Pharmaceutics and NOVEL Drug Delivery Systems. I feel both humbled and privileged addressing this session as a keynote speaker on behalf of honourable conference management. I believe that your presence and participation will certainly conclude some comprehensive and validated recommendations as per the theme of the conference. I do believe, this event will approve some gold standards for the development of a novel community health system around the globe. We are here because we do realize an urgent need to upgrade and energize the provision of safe and effective research based medication for the treatment of challenging diseases in our specific regions and throughout the world on cumulative basis. We are the architects of medicine; responsible to execute the potent recipe, cost effectiveness, quality assurance and safe body compliance targeting the disease with an ideal mode of action. Very amicably I just want to present the following fields, if be considered in our discussions with the progress of this wonderful event: World pharma consultant forum -To design a charter to identify the needs and address the relative perspectives and indicators for up gradation and sustainability of their existing legislations in local health care system. Motivation and internship training of young pharmacist groups to unite their energies for interactive

education links, launching of campaigns to serve the ailing humanity, to improve their bilateral professional /managerial skills and cultural relations. World pharma Business forum can be introduced to avail the best possible offers/chances offered by the member countries in manufacturing, retails and marketing. Mutual retail pharmacy chains may be established within member countries. To launch a Common finance/fund so as to support the victims of natural disasters round the globe, to award the fully /partially funded scholarships to talented and deserving graduates and post graduate levels. To establish regional consortiums for increasing the span of activities and more authentic feedback. To draft a viable plan to involve the pharmacists in PHARMACOGENOMICS, Use of SCREENING PROTOCOL, BIOLOGICS, PATIENT COUNSELLING and CLINICAL MANAGEMENT SKILLS. Enjoy this beautiful STAY in UAE where all the intellectual pharma brains around the globe have teamed up under one roof of this convention centre, with one aim to provide the safe cheap and effective medication for ailing humanity. No doubt, we are sincere enough. I request you all to utilize this quality time to conclude the event with an impact of deliverance. Life achievement conclusions will certainly make us proud for rest of our lives. Long live everybody. Be blessed and stay healthy. A big warm hug and Love from my side. May God help us with our aim.
