

3rd International Conference on

PHARMACEUTICS & NOVEL DRUG DELIVERY SYSTEM

&

3rd International Conference on

CHEMICAL ENGINEERING & TECHNOLOGY

December 05-06, 2018

Dubai, UAE

To formulate the viable recommendations for validating the authority of pharmacists to modulate the world's novel health systems

Syed Iftikhar Hussain Shah
Addis Pharmaceutical, Ethiopia

It's really a wonderful experience to address the Pharmaceutics conference here in Middle East UAE. Aim of the conference is to modulate some innovative recommendations for developing a novel health (pharmaceutical) system worldwide. A viable mode of action may certainly be concluded to launch an effective and efficient campaign for the ailing community of our regions for curing and prevention of acute and chronic diseases encountered every day. Pakistan has been developing its Pharmaceutical sector by a vibrant cumulative cooperation between government and private sector. We are confident and hopeful to further overcome the disabilities and problems encountered by Pakistani market. Drug Regulatory authority of Pakistan is assuring the implementation of established QA standards complying with the true sense of an ideal GPP in respective institutions: Education, R&D, Industry, Hospital, Retail and marketing. Young Pharmacists are encouraged and have been fully equipped with hi-tech research laboratories

for developing/evaluating new and effective medicinal products as per established Quality standards of GMP, CGMP and QA. Pakistan is a land of opportunities having the most fertile soils with six seasons countrywide over the year to grow and cultivate the crops of even high valued potent Medicinal plants. With some collaborative help and insight we can create and develop feasible strategies that may lead to deal with the business of producing and exporting the standard Medicinal EXTRACTS worldwide (CPEC projects) for the mfg. of effective, Cheap and safe drugs to treat acute and chronic diseases. Pakistani market has shown promise and a safe environment for foreign professionals-Plan to visit Pakistan for sharing the collaborative expertise amongst, with the hope that "MEETING"OFFICIALS will realize the need to provide us an opportunity for hosting the next Pharmaceutics conference in Pakistan.

Biography

Syed Iftikhar Hussain Shah has completed MPhil in Medicinal Biochemistry with publication in Journal of pure and applied Sciences.
