

16<sup>th</sup> International Conference on

# MODERN DENTAL HEALTH & TREATMENT

September 21-22, 2018 | Philadelphia, USA

---

## **Digital approach in Dentristry prosthetic approaches, solutions and protocols for dealing with complex digital full cases**

**D T Filippo Squicciarini**  
IPSIA L. Santarella-BARI

**D**igital dentistry requires different skills. We will see what digital flow means and how to manage in the best way all the opportunities that arise daily. We will see how to manage complex rehabilitations such as Toronto Bridge and implant support bars, completely digital with innovative materials. Understanding what a Marker is and seeing how it works is the basis of a successful digital prosthesis. Stereolithographed models and high precision prostheses are the key to success. With the use of open source software we will see how to create tools and tricks that facilitate the practice of daily work.
