

International Conference on

NURSING EDUCATION & PRACTICE

November 26-27, 2018 | Las Vegas, USA

Ahmed A Bahnassy

King Fahad Medical City, Saudi Arabia

Study design in clinical research

This session aims to introduce participants to the concept of study designs and to outline the strengths and weaknesses associated with the observational study designs used in evidence based medicine. By the end of this lecture the participants will be able to learn

- The unique characteristics, strengths, and weaknesses of common observational research study designs
- Cross-sectional, case reports and case series
- Prospective & retrospective studies
- The levels of evidence and how study design affects the strength of evidence
