Introduction: Natural Earth magnetic field (EMF) is promoting factor for division mother cell's into two baby cells. Natural Earth magnetic field adding with technogenic electromagnetic field and results is a nonhomogeneous stronger magnetic field in people leaving area i.e. an anomalous magnetic field. Anomalous magnetic field affects the normal functioning of the cell. Cells that divide endlessly are cancer cells destroying organs and organism.

Aim: Prove that malignant diseases appear in anomalous magnetic fields (AMF). Clarify unclear topics from medical literature concerning etiopathogenesis.

Work Methods: Magnetic fields measuring by proton magnetometer. Particularly, measuring in patients' beds because of exposition duration. Measurement points per square net 10x10 cm. If measurements discover AMF, the patients are moved into natural EMF and their health conditions followed. The research lasted for 30 years with both sexes and all ages and included a total of 2000 cases.

Results: All diseased have stayed and slept in the anomalous magnetic fields. Correlation between the position of the anomalous magnetic field and

the location of the diseased organ is determined. In measurement process were defined areas with AMP in beds while on the remaining bed surfaces there were natural values of ZMP. The research was performed on a group of 30 patients with malignant breast disease that were monitored during the classical medical treatment process. The process was followed, with mastectomy, metastases, and the only 3 patients are surviving, and only surviving patients were excluded from the AMP and was stayed in space of a natural EMP.

Conclusion: 1. Based upon results, magnetic fields in patients' beds' measurements correlation between AMF and the diseased organs found. 2. Many years following health condition during patients' stay in natural EMF, health condition improvement and no recidivism found. 3. Unclear topics from medical literature, i.e. etiopathogenesis, clarified based upon knowing AMF and natural EMF effects. All presented gives the conclusion that AMF located in beds are the main cause of malignant diseases appearance. The discovered cancer cause imposes the obligation to improve treatment and prevention, which is in spending the night and day rest in natural Earth magnetic field.

Biography

Nikola Trifunovic is a graduate engineer of geophysics, an honorary member of the Serbian Medical Society and a member of the Serbian Academy of Innovation Sciences. Investigated and analysed for over 25 years, the impact of the Earth's magnetic field (ZMP) on bio-systems and even on humans. He found that the unnatural ZMP were the triggers of the mentioned diseases.
