A DEEP RESEARCH AND STUDY ON THE UNIMAGINABLE SCIENCE AND TECHNOLOGY OF THE ALIENS

Abraham Mannil Thomas

Promoters of Superscience, India

This dissertation speaks of the evaluating of the Aliens through the evaluation of the mankind by the Aliens. The Alien's evaluation of the mankind is an amazing learning, comprehended and made concrete, presented in the dimension of the learning of the Aliens, whose function and revolving is through superior and higher brain system. The learning of the unimaginable standard of science and technology of the Aliens is not through the till now existing written books or through the experiments in the laboratory nor from any standard of computer or google, nor through visualizing the evidences by the use of any powerful equipment etc., but through the tapping of the vehemently moving motions that are passing throughout the whole universe. Moreover, the scientific evaluation of the Aliens upon man is beyond the scientific evaluation of man by himself. It is a fact that the Aliens are not imprisoned in the biological life in every man. Rather the Aliens are straightaway the super animals with super anatomical system. The Aliens do not face physical death. But they can change their body. But this is changing of body for an Alien is permitted only in an emergency situation but not as and when they like.

BIOGRAPHY

Abraham Mannil Thomas pen named the Man of the East. He is the discoverer and author of many mathematical and scientific discoveries. He has been engaged in serious research and publication of philosophical and scientific books for the last four decades. So far there are 26 published books to his credit, including the book, The Aliens in 48 pages published in December 2012.
