

# 34<sup>th</sup> European Ophthalmology Congress

November 23-24, 2020 | Webinar

Mashaeh Al-Namaeh O.D., Int J Ophthalmic Pathol 2020, Volume 09  
DOI: 10.37532/2324-8599-C2-016

## An Update of Systemic Medications and their Ocular Side Effects

**Mashaeh Al-Namaeh O.D., M.S., Ph.D., FAAO, Dipl ABO**

<sup>1</sup>TelaSight Inc Consultant, Louisville, USA

<sup>2</sup>Adjunct Prof: Oulu Applied Health Sciences, Finland

The purpose of this presentation is to discuss and review the ocular adverse effects that caused by major oral medications in our clinics every day, such as antibiotics, anti-inflammatory medicines, steroids, beta blockers and herbal medicines. Eye care professionals should consider listing the medications that the patient is taking before attempting to diagnose patient symptoms.
