

International Conference on

PLASTIC ENGINEERING & POLYMER SCIENCE

June 25-26, 2019 | Tokyo, Japan

Bioenergy, environment and sustainable development

Abdeen Mustafa Omer

Energy Research Institute, UK

Sustainable energy is energy that, in its production or consumption, has minimal negative impacts on human health and the healthy functioning of vital ecological systems, including the global environment. It is an accepted fact that renewable energy is a sustainable form of energy, which has attracted

more attention during recent years. A great amount of renewable energy potential, environmental interest, as well as economic consideration of fossil fuel consumption and high emphasis of sustainable development for the future will be needed.
