## Contact Lens History and Contact Lens-related Complications: A Review

**Mashaeh Al-Namaeh O.D., M.S., Ph.D., FAAO, Dipl ABO**

<sup>1</sup>TelaSight Inc Consultant, Louisville, USA.

<sup>2</sup>Adjunct Prof: Oulu Applied Health Sciences, Finland

About 125 million people globally (2%) use contact lenses, which include 28 to 38 million in the USA and 13 million in Japan. Contact lens complications are common and may lead to significant vision-threatening complications. This presentation will review the history of the contact lens, contact lens solutions and the most common contact lens complications.
