Oldage isolation and loneliness

Selerio Percy Moroka

Management College of Southern Africa, Botswana

I have been dealing with the oldage people for the past 10 years. Our foundation advocate for social and economic walfare of the elderly.We tackle isolation and loneless in oldage.In Africa the old people do not agree with old age homes, due to family structures and stigma associated with it. So i have been doing more reseaches and coming up with strageries on how to deal with this problem especially in southern african countries. It came to my attention that the elderly have suffer the problem of civilasation especially the mode of communication of

today, social networks and others which are mostly used to communicate, hence it is difficult for the elderly to access services since they do not have more information.

Biography

Selerio Percy Moroka completed BCOM at the age of 3 years from Mancosa and I am the chairman of leadingage foundation.
