THE INVENTION OF THE ALL-ROUND SEVEN LIVES OF THE UNIVERSE THAT IS CONCENTRATED IN MAN

Abraham Mannil Thomas

Promoters of Superscience, India

Man is with seven lives of the universe concentrated in him. Unlike other animals, man alone is with the planet life and its specialties. In the product life, man is with thinking, talking and attitude. The life of man that is uniquely concentrated from the planet earth gives man his unique visage unlike all the animals. Moreover, man has a permanent life consisting of the rational power with a Law of intellect; a law set within to be followed consciously, and together with these two aspects, the permanent life of man is exposed through his orderly set and grammatically spoken language voice. Man has many abstract faculties as his internal aspects being the miniature aspects of the abstract faculties of the universe concentrated in him. With the permanent life in him, man is similar with the Aliens, who are in distant planets. The universal language voice was exploded millions of years ago resulting in trillions \times trillions of the spark-parts of the universal language voice. Each spark-part of the universal language voice is concentrated in every man as his self-voice of language voice and then as his abstract human part. The spark-part of the universal ideas, universal ideologies, universal knowledge and the constituted knowledge behind the universe are concentrated in man as the treasures of ideas, ideologies, knowledge and hidden knowledge in man.

BIOGRAPHY

Abraham Mannil Thomas pen named the Man of the East. He is the discoverer and author of many mathematical and scientific discoveries. He has been engaged in serious research and publication of philosophical and scientific books for the last four decades. So far there are 26 published books to his credit, including the book, The Aliens in 48 pages published in December 2012.
