

2nd Annual Conference on

3D PRINTING & ADDITIVE MANUFACTURING

May 22-23, 2019 | Dubai, UAE

Training, research, technology consultation & services – 3D graphy a global platform

Shibu John

Trinity Media & Marketing, India

3D GRAPHY is a global platform for training, education, technology consultation & Service. and 3D GRAPHY LAB is a set up instituted for Medical Hospital, Dental Hospitals, Medical Colleges, Dental Colleges, Private medical institutions offering a one-stop solutions in imaging, design, scanning, 3D printing, training & services. The set up will benefit the dental, maxillofacial, craniofacial, orthopedic, plastic surgery, prosthetics, bioprinting, research, medical devices and other clinical requirements across specialisations. The lab is an institutional body providing an end to end solution with 3D printing for

medical prototypes for students for hands-on training and study. For professionals like doctors and surgeons it is a means for diagnosis with pre-op planning before the actual surgery for a successful procedure. It is also used for actual implants in dental, maxillofacial, orthopedics where the part can be 3D Printed in metal like cobaltchrome, stainless steel, titanium and biocompatible material like peek and various materials which are approved by FDA and authorized medical bodies.
