

## Conference Announcement

# 26<sup>th</sup> International Conference on Neurosurgery and Neuroscience Conference Announcement scheduled in June 17-18, 2020 | London, UK

**Harish C. Pant**

*Senior Investigator at National Institute of Neurological Disorders and Stroke, Bethesda, USA; Email: panth@ninds.nih.gov*

Neurosurgery 2020 is an annual meeting which gathers Neurosurgeons as well as Neurological researchers at London, UK on June 17-18, 2020 to explore the future of the Neurosurgery and Neurological disorders which offers you to pay attention to distinct factors of new ideas and developments in Neurology and Neurosurgery to enhance public health and well-being. Neurosurgery 2020 participants include professors, researchers, physicians, business delegates, scientists, students all over the world.

Neurosurgery is a surgical examination which deals with the neurological treatment of specific disorders related to the brain, spinal cord, peripheral nerves, and the extra-cranial cerebrovascular system is known as neurosurgery. Back pain can sometimes produce neurological symptoms such as numbness, muscle weakness, and loss of bowel and bladder control due to dysfunction at the nerve root. These symptoms are indicators that neurosurgery is required to treat the underlying cause of back pain as opposed to conservative treatments. Procedures to treat back pain under the realm of neurosurgery include discectomy, laminectomy, and spinal fusion surgery. In neurosurgery, there is a higher risk of further nerve damage and infection which may result in paralysis. Emergencies like intracranial hemorrhage and neurotrauma are basically involved in most of the neurosurgery.

Neurosurgery 2020 is supported by the organizing committee network of renowned scientific and professional expert such as Roberto Cartolari Senior Radiologist at the Radiology Service S. Giovanni Hospital Switzerland, Radu Mutihac, Chair of Medical Physics, University of Bucharest, Romania has provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Chemistry.

The demand for neurosurgery is expected to grow from USD 7.5 billion in 2019 to USD 14 billion in 2024, at a CAGR of 13.0% during the forecast period. The increasing prevalence of neurological diseases, efforts to develop the neuromodulation application basis of neuroendoscopic surgeries over traditional brain surgery are driving the growth of the neurosurgical devices market.

Neurosurgery 2020 conference is going to be held from January 2020 to December 2020 at various cities in Europe (London, Rome, Berlin, Frankfurt, Amsterdam, Switzerland, Paris, and Many More..!!!We truly believe that Neurosurgery 2020 in London will be a highly rewarding event for everyone, which will help in health enhancement and quality of life.

- Neurosurgery 2020 Highlights include:
- Keynote sessions by world's most eminent researchers
- Meeting with eminent speakers from all around the world
- Learning an Networking with Experts
- Nominations for best posters
- Certificates presentation
