

2020 Conference Announcement

2020 Conference Announcement on 3D Printing and Additive Manufacturing

Dimitrios Chronopoulos

Associate Professor in Dynamics of Aerospace Structures, Faculty of Engineering,
University of Nottingham, UK, *E-mail: Dimitrios.Chronopoulos@nottingham.ac.uk*

3rd International Conference on 3D Printing and Additive Manufacturing will be held in Paris, France during May 18-19, 2020. Major attractions of this event would revolve around keynote presentations, oral presentations and poster presentations. This year we are focusing on the theme "3D printing: The manufacturing technology that will change the world ". The term "3D printing" is progressively utilized as an equivalent word for **Additive Manufacturing**. It transforms digital 3D models into strong solid by structure them up in layers. The innovation was first invented during the 1980s, and since that time has been utilized for rapid prototyping (RP). 3D Printing has been applied in engineering and healthcare since the beginning of 20th century. For the manufacturing of custom prosthetics and dental inserts, it was first utilized and after that on wards the medicinal applications for 3D printing has advanced essentially. 3D printing is the path towards making cell structures in a limited space using 3D printing innovation, where cell limit and suitability are spared inside the printed construct. 3D printing adds to huge advances in the medical field of tissue engineering by allowing for research to be done on innovative materials called biomaterials. 3D bio printers are streamlined to have the capacity to print skin tissue, heart tissue, and veins among other essential tissues that could be appropriate for surgical treatment and transplantation. This innovation is utilized in the fields of adornments, footwear, mechanical structure, design, engineering and construction (AEC), automotive, aviation, dental and medical industries, education, geographic data frameworks, structural building, and numerous others.

[3D Printing Conference 2020](#), Paris, brings an Opportunity to attend the presentations delivered by eminent scientists, researchers, experts from all over the world and Participation in sessions on specific topics on which the conference is expected to achieve progress. It brings Global networking in transferring and exchanging Ideas. Share your excitement in promoting new ideas, developments and innovations in the field of [3D Printing and Additive Manufacturing](#).

Market analysis: The 3D printing market was esteemed at USD 10.58 billion out of 2018, and is relied upon to arrive at an estimation of USD 49.01 billion by 2024, at a CAGR of 29.48% over the forecast period 2019-2024. Toward the finish of 2018, America Makes declared it was granting USD 1.6 million to a joint undertaking between Arizona State University and the ASTM International Additive Manufacturing Center of Excellence. In the prior months of 2019, the project aims to advance post-processing methods for SLM parts. With technological advancements and product innovations, use of 3D printing technology has

found various application in a wide variety of areas, such as jet engines, advanced prosthetics, and even living tissue (with a potential to disrupt the entire manufacturing industry).

Key highlighting Sessions: [Advances in 3D Printing & Additive Manufacturing Technology](#), Innovations in 3D Printing, 3D Printing Materials, [3D Printing Technology Impact on Manufacturing Industry](#), 3D printing in Biomaterials, [Polymers in 3D Printing, Space and Aerospace 3D Printing](#), Additive Manufacturing and 3D Robotics, [Digital Light Processing \(DLP\) 3D printing](#).

In 2019 we had successfully conducted 2nd Annual Conference on 3D Printing and Additive Manufacturing in Dubai, UAE during May 22-23, 2019 with 7 [Organizing Committee Members](#) and 9 Renowned Speakers. Our key note speakers were Pirkko-Liisa Tarvonen from Finland, Morgan Eldred from UAE, Sofiane Guessame from France. And the conference highlights were Additive Manufacturing and 3D Robotics, [3D Printing in Biomaterials](#), PCBs Electronic Printing, 3D Ceramics Printing, Tissue Engineering and Fabrication, Medical 3D Printing: Orthodontics and Prosthetics, 3D Printing in Automotive Industry. The theme of the conference was 'Execution of Envision & Visuality by 3D Print'.

Your rejoinder is our inspiration; keeping this motto in our mind we would happy to welcome you at our upcoming 3rd International Conference on 3D Printing and Additive Manufacturing will be held in Paris, France during May 18-19, 2020.'
