

2020 Conference Announcement

26th International Conference on Psychiatry, Mental Disorders & Psychosomatic Medicine

Federico Amianto

University of Turin, Italy, E-mail: federico.amianto@unito.it

Investigating Innovative Therapies to Achieve Mental and Physical Wellness

International Journal of Emergency Mental Health and Human Resilience

With the prosperous completion of our “25th International Conference on Psychiatric Disorders & Psychosomatic Medicine” which was held in Bangkok, Thailand on November 05-06, 2018 based on the theme of “Application of Psychosomatic Medicine to Achieve Mental and Physical Wellness”, we are glad to bring it back with a much refreshed and newer version of the “[26th International Conference on Psychiatry, Mental Disorders and Psychosomatic Medicine](#)” which is scheduled to take place in **Amsterdam, Netherlands on April 27-28, 2020**.

“*Disordered Eating, attachment, self-development and articulation of individual psychotherapy with family intervention*” by Dr. Federico Amianto, University of Turin, Italy

Meet our OCM and Renowned Speaker Dr Federico Amianto is expert in psychotherapy and his passion in exploring the relationship between personality traits, attachment dynamics, parenting functioning and self-development applying neuroimaging techniques. His model of intervention on severe eating disorders is based on the arrangement of the attachment experience both as a psychotherapeutic experience and as a change in family dynamics, coupled with inner changes in the functioning of the self. It is applied successfully in the Regional Pilot Centre for Eating Disorders and in the Centre for Eating Disorder and Psychopathology of Adolescence at the Regina Margherita Child Hospital in Torino. The model is addressed not only to those who are affected with eating disorders but represents a path for personality and self-development in adults who suffer from any psychological trouble. The hope for the future is to find out the psychobiological mechanisms that regulate the caregiver-adolescent interactions to promote a successful adult development in everyone.

The past conference proceeded through various Scientific Sessions with highlighted **Keynote presentations** by:

- 1) Joseph Rosado, Coastal Pain and Neurology Centre, USA

- 2) Hajra Hussain, City University of London, UK
- 3) Petr Zach, Charles University, Czech Republic
- 4) Donald R Posson, National University, USA
- 5) Masaki Otagiri, Sojo University, Japan
