Eman Anwar

Alexandria Faculty of Medicine, Egypt, Email: dremanpharma@gmail.com

With the quick difference in way of life and atmosphere, step by step diabetes is getting expanded among the people groups. The pervasiveness of diabetes for all age-bunches worldwide was assessed to be 3% out of 3000 and 5.2% of every 2080. A malady is a specific anomalous condition or a turmoil of that influences part or the majority of life forms. In a previous couple of years, Diabetes is rising quickly among the vast measure of a populace. [Diabetes](#) in any event pairs a man's danger of death. In the United States, diabetes cost \$300 billion out of 2014. In this manner, the reason for sorting out the Diabetic 2019 meeting in Abu Dhabi is to re-join the general population on a worldwide stage and influence them to raise hands against Diabetes.

Diabetes is holding almost total population and anyway the reason can be hereditary or obtained because of lifestyle or some other, but the issue is noticeable. Around 162 million population, which is over 7.1% of the adult people have diabetes. The ordinary time of starting is 42.5 years. Around 10 million deaths occur because of diabetes every year around the globe. The amount of people being resolved to have prediabetes or [Type 2 Diabetes](#) is extending bit by bit. It is essential to consider genuine standard mistakes in diabetes the board and how to avoid them. Adopting a solid way of life can make to stay away from or postpone the start of diabetes and is essential to oversee diabetes. It's furthermore essential to normalizing your fundamental including weight, glucose, BP, and blood cholesterol. Individuals living with type 2 diabetes should comprehend that being overweight or fat makes it difficult to manage diabetes. It moreover constructs the danger for high blood cholesterol and hypertension, which are ordinary peril factors for cardiovascular diseases.

Eman Anwar had given "*Anti-diabetic drugs & cancer risk challenge*" in which Increasing evidences of cancer development in diabetic patients were reported. To reduce the cancer risk associated with [anti-diabetic medications](#) use, treatment with [metformin](#) is recommended throughout the course of the disease as long as it is medically acceptable. Also, strong efforts to reduce excess of body weight should be taken. The selection of other anti-diabetic classes as an add-on treatment to metformin is based on cancer risk assessment and review of cohort studies and meta-analyses reports on their associated [cancer](#) RR.

Diabetic 2020 welcome the delegates across the country to enlighten the young and fresh minds of the scholars, researchers, student communities and industrial delegates to attend the "27th International Diabetes and Healthcare Conference" as it is open to research methodologies which explores the new dimensions regarding this field.

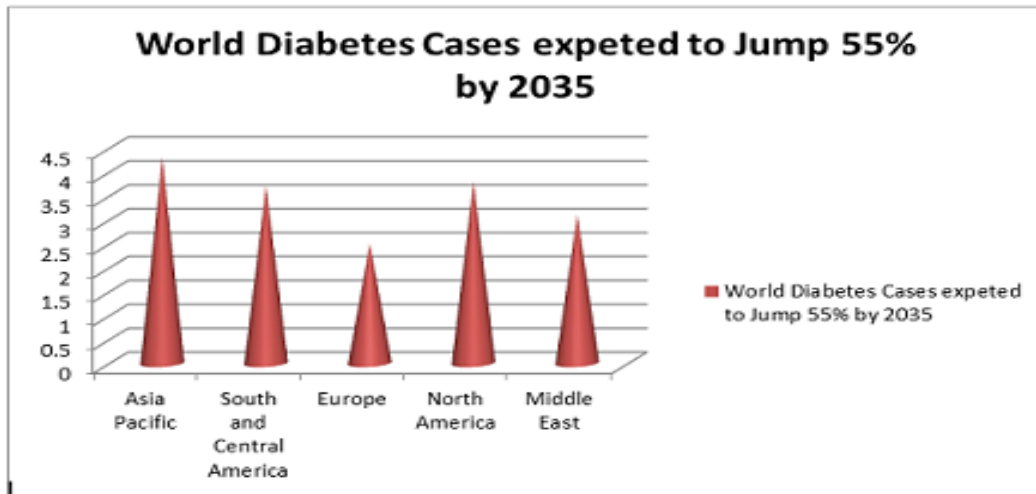

Diabetes reduce the burden of diabetes mellitus (DM) and improve the quality of life for all persons who have or are at risk for diabetes mellitus. As the number of patients grows across the globe, there has never been a stronger and more urgent need for therapeutic measures that arrest the growth of the disease and alleviate its secondary manifestations. DM affects an estimated 30 million people in the United States and is the 7th leading cause of death. It increases the all-cause mortality rate 2 times compared to persons without diagnosed diabetes. It Increases the risk of heart attack by 2 times, in addition to these human costs, the estimated total financial cost of DM in the United States in 2019 was \$350 billion, which includes the costs of medical care, disability, and premature death. The importance of both diabetes and their comorbidities will continue to increase as the population ages. Therapies that have proven to reduce microvascular and [macrovascular complications](#) will need to be assessed considering the newly identified comorbidities.

Rise in diabetes global market from the year 2018-2020 with an increase in 4.4% compound annual growth rate (CAGR).

The Annual conference enlightens the recent advancements related to Diabetes and aims at sharing the knowledge of the expertise in this field where the new generation scholars and researchers can increase their knowledge related to diabetes.
