On behalf of Lexis Conferences Organizing Committee we cordially welcomes all the participants and contributors from worldwide to attend World Congress on Psychiatry and Mental Health which is going to be held in San Francisco, USA during November 05-06,2020 across the theme "Exploring Innovative Therapies to Achieve Mental and Physical Wellness".

We invite you to join us at [Psychiatry](#), Mental Disorders and Psychosomatic Medicine Conference where you will be sure to have a meaningful experience with scholars from around the world. Generous response and active participation from the Editorial Board Members of conference related Journals as well as from the scientists, researchers and leaders in the field of will make this conference as one of the most successful and productive events in 2020.

[Psychiatry](#) is the branch of medicine focused on the diagnosis, treatment and prevention of mental, emotional and behavioral disorders. A psychiatrist is a medicinal specialist who represents considerable authority in psychological well-being, including substance utilizes clutters. Therapists are met all requirements to survey both the mental and physical parts of mental issues. Our main goal is to make Annual Congress on Mental Health an extraordinary accomplishment with world class talks and discussion by the best Psychiatrists and Psychologists in the field.

The [Psychiatric](#) Hospitals industry is made up of hospitals that specialize in the treatment of mental illness and behavioural health. The industry is mainly supported by government-sponsored healthcare, which accounts for nearly two-thirds of mental healthcare spending in the United States, according to the US Department of Health and Human Services. As a result, the expansion of Medicare and Medicaid has had a significant effect on the Psychiatric Hospitals industry. Over the five years to 2019, federal funding for Medicare and Medicaid has increased at an annualized rate of 4.0% as a result of healthcare reform. In addition, wider acceptance and prevalence of mental illness has also supported demand for behavioural health treatment.
