

Awards 2020

Materials science and Chemistry Conference scheduled on May 18-19, 2020 at Berlin, Germany

David Kreher

Associate Professor at UPMC, E-mail: david.kreher@upmc.fr

Chemistry is the branch of Science that is involved in the study of composition, properties and reactivity of matter. Chemistry is called the central science because it is involved in every other science as a foundation for example it is part of materials as materials chemistry; it is part of ecology as the formation of ozone. Materials science is a part of chemistry. Chemistry is concerned with composition, properties and behavior of matter. Materials science limits its distinct subject to exploring and designing the relationship between the basic microstructure of a material and its impact on its macroscopic properties. The application of materials science to industrial processes was undertaken in the 19th century. The materials will provide an alternate route in which the chemistry can be undergone with an accelerated rate, whereas without the materials will lack activation energy for the chemical reaction to occur.

The Materials Chemistry 2020 is an event that aims to explore the ways to innovate in the field of materials science and chemistry, and to find new materials for better industrial development at Berlin, Germany on May 18-19, 2020. The conference will serve as a platform to bring together leading chemists with different specialties such as inorganic, organic etc. Materials chemistry conference will discuss on the topics such as Materials Science, Chemistry, Organic Chemistry, Polymer Chemistry, Applied Materials Chemistry, Inorganic Chemistry, Polymeric Materials and Physical Chemistry.

Research Contribution and Achievement

The Conference recognized the outstanding contribution to experimental research that has increased our understanding of Materials Science and Chemistry. Awards provide an opportunity to the participants like outstanding researchers, exceptional graduates or early academicians and organizations to showcase their best research and projects to the world related to the conference theme. It also recognizes individuals for their contributions to the scientific community related to the conference theme, also provide platform to professional networking with researchers of similar interest from others part of the world.

CALL FOR NOMINATIONS

Expert Level (Scientific Service Achievement Award)

The purpose of **Scientific Service Achievement Award** awards is to recognize outstanding research achievements in the area of **Materials Science and Chemistry**. The applicants should have minimum of **20+ years of experience** in the relative field in public or private sector. The applicants are expected to enhance the quality of research should take lead in researching the current trends and developments towards the related subjects. The applicants can be nominated through online.

Professional Level (The Research Contribution Award)

The **Research Contribution Award** is for highly experienced professional (10+ years) who has made significant discoveries, made important advances in his or her chosen career path in the area of **Materials Science and Chemistry** in the public or private sector. Part-time research experience would be counted as pro-rata. It is calculated starting from the date when you obtained the (first) degree entitling you to embark on a doctorate (either in the country in which the degree was obtained or in the country in which the researcher is recruited), even if a doctorate was never started or envisaged. The applicants can be nominated through online.

Scholar Level (The Upcoming Researcher Award)

The goal of this Upcoming Researcher Award is to support developing scientist, researchers and experts (10+ years) with innovative research works of excellence related to the area of Materials Science and Chemistry. It will provide the best platform to expand your network by widely discussing your research advances and their outcome. Presentation includes 25-30 minutes of oral talk on the scientific research topics based on the theme of the conference along with 5 minutes panel discussions. The applicants can be nominated through online.

Women Scientist (The Women of Science Award)

This Award is to recognize outstanding contributions of Women Scientists in both basic and applied research in the areas of Materials Science and Chemistry with potential for application/product and technology development. Through this conference, a launch pad is provided for Women Scientist for presenting their research advances. As a part of encouragement to women scientist's participants, awards and assistantship for women scholars in career development and research guidance through our collaborations will be given. We

cordially invite women scholars and scientists from Universities/ Industries to who have 10+ years of research experience to join the forum. The applicants can be nominated through online.

Outstanding speaker in Materials Chemistry Conference 2020

The purpose of the Outstanding Speaker award is to highlight exceptional research by the participants at the conference related to the theme. The applicants can be nominated through online. It is also an initiative with intention of supporting young researchers (student) in their quest to advance the frontiers of Materials Science and Chemistry.

Best Keynote Speaker in Materials Chemistry Conference 2020

This Award is for speaker who gives interactive key note presentation to inspire and motivate participants. It will be given to the speaker who has made significant contributions advances in their projects, strategies, and schemes and successfully implemented to improve long-term excellence in Materials Science and Chemistry. The deserving applicants can be nominated through online.

Best Poster Presentation in Materials Chemistry Conference 2020

The Best Poster Awards is given to the student and recent graduates for an outstanding research presented as a poster. All accepted abstracts will be presented at the poster sessions during the conference. It provides a launch pad for sharing the significant research related to Materials Science and Chemistry. It gives a framework to visually summarize your work, to engage others in discussion and opening to entice others to learn more by reading full paper.

Outstanding Masters/Ph.D./Post Doctorate thesis work Presentation in Materials Chemistry Conference 2020

This Award is part of the conference to support young researchers, with the intention of supporting young researchers in their quest to advance the frontiers of science across a broad range of Materials Science and Chemistry. This Award has been designed to recognise outstanding young scientist and researchers who have made significant contributions in their area of research. The deserving applicants can be nominated through online.

Materials Chemistry 2020 supported by the organizing committee network of renowned scientific and professional expert such as **Mohamed Sijaj**, The Université du Québec à Montréal (UQAM), Canada, **David KREHER**, UPMC, France, **Hanshan Dong**, University of Birmingham, UK, **John O Roberts**, **Kyriakos Porfyrakis**, University of Oxford, UK, **Osman Adiguzel**, Ankara University, Turkey, **Paolo Arosio**, Università degli Studi di Milano it provided a platform for collaboration among colleagues, vendors, and academia to reveal new

innovations, solutions, ideas, and emerging technologies in Materials Science and Chemistry.

The GDP is projected to rise by 2.5 percent in 2019, 1.9 percent in 2020 and 1.8 percent in 2021. The chemical industry will be source of strength, with growth of 2.5 percent in 2019 and 3.0 percent in 2020. In fact, chemical industry growth will exceed that of the US economy through 2024.

Materials Chemistry Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More..!!!
