

# 10th Glycobiology World Congress

## July 17-18, 2020

Virginia Pascual Ramos,

Department of Immunology and Rheumatology, Instituto Nacional de Ciencias Médicas y Nutrición Salvador Zubirán, Mexico City, Mexico, E-mail: [virtichu@gmail.com](mailto:virtichu@gmail.com)

**Glycobiology** is the study of everything related to the structure, biosynthesis, and biology of sugars and saccharides drawing from simple organic chemistry, molecular and cellular biology, enzymology and related domains. Like amino acids and nucleic acids, sugars are the major contributors in nature many natural products contain oligosaccharides that are important for their biological and biochemical activity and carbohydrates have major roles in a wider range of biological processes including signal transduction mechanisms and immune responses. So, the study of glycan structures is also complicated by the lack of a proper and direct template for their biosynthesis, contrary to the case with amino acids and proteins...

**Glycobiology 2020** is a three day event consisting of a lettered scientific program, laudable talks by the top notch of the global scientific community, that brings together active researchers, intellectuals, academicians, students, contributors and industrialists to exchange ideas communicate and discuss research findings on new advancements in all kinds of available research worldwide innovative research products which can be exhibited for further development in glycochemistry. This glycochemistry Congress is going to be the largest and most promising international conference that specifically focuses on the Structural Biology by bringing all renowned researchers under one roof. This is a two-day multidisciplinary meeting covering all aspects of novel research and contributions in the field of Glycobiology.

10th Glycobiology World Congress was inaugurated followed by the key note session by Colin Paul Spears, California Northstate University College of Medicine, USA, Juan Pablo Marquez-Manriquez, Sonora Cancer Research Center (CICS), USA, Georgia Zhuo Chen, Emory University-School of Medicine, USA, Douglas E Gladstone, Johns Hopkins University, USA. The session was Chair by Guoxiong Xu, Jinshan Hospital of Fudan University, China and Co-Chair by Vincent Murray, University of New South Wales, Australia.
