

12th International Virology Summit

Vsevolod A Zinserling

Director: Saint-Petersburg University, Russia

E-mail: zinslerling@yandex.ru

2020 Conference Announcement

Virology is a branch of microbiology dealing with viruses. Diseases caused by virus have been known since from the 1700s and cures for many were effected, the causative agent was not closely examined until 1892, A Russian bacteriologist, Ivanovski, was observed that the causative agent (later proved to be a virus) of tobacco mosaic disease could pass through a porcelain filter impermeable to bacteria. In 1940 the direct visualization of viruses became possible by introducing the electron microscope. Tobacco mosaic virus became the first virus to be crystallized in 1935 and the poliomyelitis virus was crystallized in 1955. Virology is a discipline of immediate interest because many human diseases, including smallpox, common cold, rabies, measles, many forms of diarrhoea, hepatitis, AIDS, dengue fever, yellow fever, polio, influenza, etc as well as a host of economically important plant and animal diseases are caused by viruses. Cold sores and genital herpes were caused by Herpes simplex and is under investigation as a possible factor in Alzheimer's.

11th International Virology Summit viewed a union of peerless speakers who educated the crowd with their knowledge and confabulated on various new-fangled topics related to the field of Virology. **Mohammad Mir**, Western University of Health Sciences, USA presented a Keynote speech on "**Hantavirus RdRp requires a host cell factor for Cap Snatching**" and **Vsevolod A Zinserling, Saint-Petersburg University, Russia** presented a Keynote speech on "**HIV Infection and its complications from pathologist's point of view**".

With the grand success of 11th International Virology Summit, we are glad to announce our next upcoming conference Euro Virology 2020 at Rome, Italy on June 24-25, 2020. The conference will serve as a platform to bring together leading Virologists with different specialties International Virology Summit will discuss on the topics such as [General Virology](#), Molecular & Cellular Virology, Animal Virology, Clinical & Diagnostic Virology, Anti-Retroviral Therapy, Antiviral Drug Discovery and Development, Viral Vaccines, STD & HIV/AIDS and Emerging Viral Diseases, Respiratory viral diseases,

Neurologic Viral Diseases, Insect vector and virus epidemiology, Hepatic viral diseases, Bacterial Virology, Fungal Virology, Viral Immunology, Viral Oncology, Plant Virology, Pathogenesis of Virus and Microbiology.

In 2017 the global virology market is estimated at \$1693 million and is estimated to grow at a CAGR of 5.4% during the forecast period 2018-2023. North America is one of the leading market holders driven by world class healthcare substructure with technological advancement practice.

Europe is projected to maintain the position as the second largest market globally. Europe is anticipated to record the highest CAGR, attributed by facilitated access to diagnostics, enhanced healthcare infrastructure, and growing affordability of diagnostic tests for viral diseases during the forecast period.

The Global Virology Conferences are going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... and Many More..!!!
