

2020 Conference Announcement

2020 Announcement of Big Data Analysis and Data Mining, July 17-18, 2020 | Vienna, Austria

Adam Mohamed Ali Fadlalla

Professor & Associate Dean, Department of Information Systems, Qatar University, Doha, Qatar, E-mail: fadlalla@qu.edu.qa

Conference Announcement

Data mining is the process of identifying valid, novel, useful and understandable patterns in data and Extraction or discovery of useful summaries of data patterns or knowledge from huge amount of data from massive amount of data and also called as KDD Knowledge Discovery in Databases. A KDD process includes data cleaning, data mining, data selection, transformation, data integration, pattern evaluation, and knowledge presentation. It's an explosive Growth of Data from terabytes to petabytes. Confluence of Multiple Disciplines includes Machine Learning, Statistics, Artificial Intelligence, visualization, High Performance Computing, Database Technology, Algorithm, Pattern Recognition its applications includes Biological and medical data analysis: classification, cluster analysis and microarray data analysis, web mining.

With the grand success of Data Mining 2019, we are glad to announce our next upcoming conference **Big Data 2020** at **Vienna, Austria** on **July 17-18, 2020**. The conference will serve as a venue for researchers with different specialties such as Big Data, Machine Learning and **Artificial Intelligence** etc. Data Mining Conference will discuss on the topics such as Data Mining, Algorithm, Cloud Computing, Cloud computing, Big Data Analytics, Internet of Things (IOT), Nano informatics, Data Warehousing and Machine Learning.

Data Mining 2020 supported by the organizing committee network of renowned scientific and professional expert such as **Adam Mohamed Ali Fadlalla**, Qatar University, Qatar, **Crina Grosan**, Brunel University, UK, **Shailendra S. Aote**, India, it provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Engineering.

The Big Data and business analytics market has grown at a healthy clip over the past few years. The market made \$122 billion in global revenue in 2015, which jumped to \$149 billion in 2017, \$169 billion in 2018, and an estimated \$189 billion in 2019 and will shoot up to \$274 in 2022. In fact, Data Mining industry growth will exceed that of the US economy through 2024.

Data Mining Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More....!!!)
