- Best Speaker awards

**Scientific Session:** Food Analysis, Food and Nutrition, Food Preservation, Food Process Engineering, Food Nanotechnology, Biotechnological Applications in Food Technology, Food Safety, Food Waste Management, Case Reports on Food Technology, Nutrition and Functional Foods, Food Toxicology

The entire accepted abstract will be published with our supporting journal Expert Opinion on Environmental Biology. For manuscript publication with our supporting journal contact us further.

Toronto, the capital of the province of Ontario, is a major Canadian city along Lake Ontario's north-western shore. It's a dynamic metropolis with a core of soaring skyscrapers, all dwarfed by the iconic, free-standing CN Tower. Toronto also has many green spaces, from the orderly oval of Queen's Park to 400-acre High Park and its trails, sports facilities and zoo. Toronto is located on the shore plain beside its harbour. There is a fairly abrupt rise 4 km inland which marks the shoreline of Lake Iroquois, a lake formed by glaciers 12,500 years ago that had a much higher water level than Lake Ontario.

French fur traders had known about the Toronto Passage since the early 1600s, and in 1720 they built a small store on the Humber River. This post failed financially and was abandoned in 1730. In 1750 the French built another small trading post. Fort Rouillé (or Fort Toronto), located in Toronto's present-day Exhibition Grounds, was burned in 1759 by its French garrison during a retreat from British forces.

Toronto's economy has gone through the stages of commercial lake port, railway and industrial hub, financial nexus, and high-level service and information centre. At present its port and commercial functions remain important, though relatively less so, apart from heavy retail activity. Its

railway role persists, but has been modified by air and automotive transport.

Toronto is the capital city of the province of Ontario in Canada. Toronto is the largest population center in Ontario with a population over 5 million. It is situated on the north-west shore of Lake Ontario. There are more people who reside in the regions around it. Toronto Area is the great metropolitan area in Canada. Toronto also has many green spaces, the oval of Queen's Park is 400-acre High Park which consists of trails, sports facilities and zoo. Toronto is a dynamic county town with a core of soaring skyscrapers, and free-standing CN Tower. Toronto is a popular destination for tourists. Toronto's motto is "Diversity Our Strength. Toronto has North America's third largest concentration of private companies. This city is a global finance, commerce as well as transportation hub. It has always been ranked highly in the fields of life expectancy, personal safety, healthcare, education etc.

**2019 Conference past report**

Meetings International successfully anchored its leading ["8th International Food Safety, Quality & Policy"](#) slated on July 22-23, 2019 at Toronto, Canada.

Food Safety 2020 is distinguished with the attendance of editorial board members of supported journals, scientists, young and brilliant researchers, business delegates and talented student communities representing more than 25 countries, who made this conference rewarding and fecund.

Our [8th International Food Safety, Quality & Policy](#) was based on the theme "NEW INNOVATIONS IN FOOD QUALITY RESEARCH" which has enlivened the below-The conference was initiated and embarked with an opening ceremony followed by a series of lectures delivered by members of the Keynote forum and Speakers. The peerless people who promulgated the theme with their exquisite talks were:
