Diabetes Care 2020 provides an overview to boost research and promote awareness aiming in developing solutions for the challenges encountered by diabetes care, obesity, human metabolism. The conference provides an international platform for all the entrepreneurs, doctors, professors, medical scholars, students, healthcare innovators, medical society and association members to share their information and point of view regarding the physiology, ailments, growth, trends, preventions and innovations related to diabetes and endocrinology. This meeting also invites medical scientists, researchers and health care professionals of all levels of experience to participate in an area of career and education growth that is not easily found within the structure of the workplace.

#### Target Audience:

- Doctors
- Scientists
- Druggists
- Entrepreneurs
- R&D Institutes
- Research Scholars
- Clinical Researchers
- Life Science Investors
- Healthcare Innovators
- Healthcare Companies
- Academic Researchers
- Public Health Professionals
- Nutraceutical Corporation members
- Diabetes Societies and Associations

Meetings International (Meetings Int.) is a global leader in producing high quality conferences, meetings, workshops and symposia in all major fields of science, technology and medicine. Meetings Int. supports broad scope research and peer review at a broad range of specialists around the world. The key strategic objective of Meetings Int. is to communicate science and medical research between academia, and industry.

Diabetes Care 2020 conference is to be held in Berlin, Germany.

OCMs for the conference are Dr. Prof. Yvonne Paul, She is an Associate Professor in Department of Sport, Rehabilitation and Dental Sciences at the Tshwane University of Technology in Pretoria, Gauteng, where she has been a faculty member since 1999. Yvonne has completed her PhD at the University of Pretoria which focuses on the discipline of Biokinetics and Sport Science, and her undergraduate was completed at University of Durban Westville in Kwa-Zulu Natal (Currently called University of

Kwa-Zulu Natal). Her research interest lies in the area of Diabetes Mellitus and in particular the Efficacy of Exercise as a modality of treatment for Diabetes Mellitus. She works in research areas related to Diabetes Mellitus and uses exercise as the treatment modality as the core treatment. She has published numerous articles in the area pertaining to health and wellness. She is also a registered Biokineticist, a profession that uses exercise as a core modality as a final phase rehabilitation.
