

## 2020 Conference Announcement of World Congress on Glycobiology & Glycochemistry

Dr. Alireza Heidari

Full Professor, Director and Enrico Fermi Distinguished Chair in Molecular Spectroscopy at CSU, E-mail: [scholar.researcher.scientist@gmail.com](mailto:scholar.researcher.scientist@gmail.com)

### Conference

The [global glycobiology market](#) is expected to reach USD 1,211.4 million by 2021 from USD 649.5 million in 2016, at a CAGR of 13.3%. Glycobiology is the study of carbohydrates and carbohydrate-containing biomolecules in biological processes. This study is used in diagnostics, drug discovery research, immunology, oncology, and various other applications. Glycobiology products are widely used for analysis of cell surface markers, which can act as diagnostic or therapeutic targets. The base year considered for the study is 2015, and the forecast has been provided for the period between 2016 and 2021.

By analyzing the importance of Glycobiology & Glycochemistry, Meetings International is organizing 11<sup>th</sup> [International Conference on Glycobiology & Glycochemistry](#) (Glycobiology & Glycochemistry 2020) during June 22-23, 2020 in Venice, Italy based on the theme "A distinctive outlook in Glycobiology & Glycochemistry". Scientific sessions of [Venice Glycobiology & Glycochemistry conference](#) includes Role in human health, Synthesis and biological role of Glycans, Glycans binding protein, Glycans are essential for multicellular life, Glycans interaction of pathogenic, microbes and host cell, The importance of Glycans in therapeutics, Inflammation is initiated by Glycans, Glycochemistry in Medicine, Glycans in drug discovery & Glycomics. [Glycobiology & Glycochemistry meeting](#) embraces with Keynote Session, Oral Session, Poster Session, Young Researchers Session and Exhibitor Session.

Venice is hosting the [Glycobiology & Glycochemistry 2020](#) during June 22-23, 2020.

Venice is the capital city of north-eastern Italy as well as famous water places in the world. The special tourist spots Venice are City of Bridge, The central square, Saint Mark's Basilica, Doge's Palace, St. Mark's Square, Rialto Bridge.

The worldwide glycobiology showcase is relied upon to reach USD 1,211.4 million by 2021 from USD 649.5 million out of 2016, at a CAGR of 13.3%. Glycobiology is the investigation of sugars and starch containing biomolecules in organic procedures. This examination is utilized in diagnostics, medicate revelation inquire about, immunology, oncology, and different applications. Glycobiology items are broadly utilized for examination of cell surface markers, which can go about as analytic or helpful targets. The base year considered for the examination is 2015, and the estimate has been accommodated the period somewhere in the range of 2016 and 2021.

By breaking down the significance of Glycobiology and Glycochemistry, Meetings International is sorting out eleventh International Conference on Glycobiology and Glycochemistry (Glycobiology and Glycochemistry 2020) during June 22-23, 2020 in Venice, Italy dependent on the subject "A particular viewpoint in Glycobiology and Glycochemistry". Logical sessions of Venice Glycobiology and Glycochemistry meeting remembers Role for human wellbeing, Synthesis and natural job of Glycans, Glycans restricting protein, Glycans are fundamental for multicellular life, Glycans communication of pathogenic, microorganisms and host cell, The significance of Glycans in therapeutics, Inflammation is started by Glycans, Glycochemistry in Medicine, Glycans in sedate revelation and Glycomics. Glycobiology and Glycochemistry meeting grasps with Keynote Session, Oral Session, Poster Session, Young Researchers Session and Exhibitor Session.

Venice is facilitating the Glycobiology and Glycochemistry 2020 during June 22-23, 2020. Venice is the capital city of north-eastern Italy just as popular water puts on the planet. The unique places of interest Venice are City of Bridge, The

focal square, Saint Mark's Basilica, Doge's Palace, St. Imprint's Square, Rialto Bridge.
