Sam Vaknin

Professor of Psychology, Southern Federal University, Rostov-on-Don, Russia,
E-mail: samvaknin@gmail.com

On behalf of Lexis Conferences Organizing Committee we cordially welcomes all the participants and contributors from worldwide to attend World Congress on Psychiatry and Mental Health which is going to be held in San Francisco ,USA during November 05-06,2020 across the theme "*Exploring Innovative Therapies to Achieve Mental and Physical Wellness*".

We invite you to join us at Psychiatry, Mental Disorders and Psychosomatic Medicine Conference where you will be sure to have a meaningful experience with scholars from around the world. Generous response and active participation from the Editorial Board Members of conference related Journals as well as from the scientists, researchers and leaders in the field of will make this conference as one of the most successful and productive events in 2020.

Psychiatry is the mind baffling, and psychologically authorizing which includes different stages of psychological conditions starting from neuropsychiatry to over-all mental conditions. Psychiatry is the principal branch of science focus on the analysis, treatment, and expectancy of psychological and behavioural changes. There is a huge number of psychiatrists and mental health professionals who are working on developing novel strategies and medication to improve the mental health of the patients.

Importance and Scope:

This conference addresses current & future trends at the interface of Neurology and Psychology. It emphasizes on the use various treatment methods for Neurological disorders. It intends to provide a platform for enthusiastic dialogs and trade between these controls. Neuropsychiatry is combination of both Neurology and Psychiatry which focuses on disorders related to mental health, in which many cases were revealed to be originated from a recognizable malfunction in the brain. The aim of Psychiatric is to comprehend the relation among the body, mind and its behavioural activities. The trained psychiatrists in the field of both neurological and psychiatric features of disease seats them in exceptional position to deliver this care. Psychiatrist's works along with additional Neuroscience clinicians, namely neurosurgeon and neurologist, to deliver complete care to the patients.

Conference name	Venue	Dates
Psychiatry 2020	San Francisco ,USA	Nov 05-06, 2020

Prospective authors are kindly encouraged to contribute to and help shape the conference through submissions of their research abstracts, papers and e-posters. Also, high quality research contributions describing original and unpublished results of conceptual, constructive, empirical, experimental, or theoretical work in all areas of Psychiatry, Mental Disorders and Conditions are cordially invited for presentation at the conference. Online entries will be accepted from January 01, 2020- October 15, 2020.

Psychiatry 2020 will be held in San Francisco, USA from Nov 05-06, 2020.

Psychiatry 2020 aims to provide a platform where academics and practitioners from cross-disciplinary fields from education, environmental protection industry, and business can come together and collaborate. The event will encourage the exploration of the potential synergies that may arise from pooling the different perspectives. We invite you to submit papers on Psychiatry and Mental Health departments. Poster and oral presentations, and thesis presentations will be included in the Conference Program. Its aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Psychiatry, Mental Disorders and Conditions. It also provides a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Psychiatry, Mental Disorders and Conditions.

Are you willing to showcase research results and recent objectives achieved? During Psychiatry 2020, all participants will be able to provide at the Earth registration desk a poster outlining your main results. Why?

Because you will have the chance to present them at the Knowledge exchange session (Nov 06 forenoon) and meet the authors of the speech you find most interesting during the final Networking Session!

Venue:

San Francisco holds a secure place in the United States' romantic dream of itself—a cool, elegant, handsome, worldly seaport whose steep streets offer breathtaking views of one of the worlds greatest bays.

According to the dream, San Franciscans are sophisticates whose lives hold full measures of such civilized pleasures as music, art, and good food. Their children are to be pitied, for, as the wife of publishing magnate Nelson Doubleday once said, "They will probably grow up thinking all cities are so wonderful." To San Franciscans their city is a magical place, almost an island, saved by its location and history from the sprawl and monotony that afflicts so much of urban California. The central business district, the financial district, North Beach, and Chinatown occupy the site of the gold-rush city, which subsequently was expanded by progressive fillings along the waterfront. The remnants of many ships that were deserted in 1849 now lie under office buildings several blocks inland. To the west, at the approach to the Golden Gate Bridge, lies the Presidio, a two-century-old military installation that became part of Golden Gate National Recreation Area in 1994; it is remarkable for its parklike lawns and wind-sculptured stands of trees.

World Congress on Psychiatry and Mental Health is an international multidisciplinary field concerned with all aspects of interaction most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Psychiatry, Mental Disorders and Conditions.

The lack of the psychological, social, or incorrect balance of daily life and relationships of the person is mental health. Mental health is about a person's overall well-being and how they feel, adapt and respond to the world around them. The WHO notes that mental health is a "state of goodness in which the individual knows his / her abilities, can cope with normal life pressure, work fertile and successful and contributes to society."
