The global substance abuse treatment market could expect significant growth at the rate of 11.6% during the forecast period (2018-2023), suggests Market Research Future. Few crucial factors backing the market growth include the rising number of addicted people, rising number of drug awareness campaigns and prevention programs, and technological innovations in the diagnostics industry

Substance abuse refers to the harmful use of psychoactive substance, including alcohol and illicit drugs. Increase trends of cigarette smoking in teenagers is one of the prominent factors driving the substance abuse treatment market according to the 2019 study in the clinical and translational investigation journal, More than 60% of individuals start smoking at the age of 13 and more than 90% individual start smoking before reaching 20 years. It is also reported that 5.8% of the Mexican population comprise adolescents between 13 and 15 years. Of them 42.8% tried a cigarette at some point in their life.

Addiction treatment is intended to help addicted individuals from compulsive seeking. Drug abuse and addiction treatments are provided in several different settings by using a number of behavioural and pharmacological approaches. The global addiction treatment market was valued at approximately US\$ 4.0 Bn in 2016 and is anticipated to expand at a CAGR of over 6.0% from 2017 to 2025 to reach value of approximately US\$ 7.0 Bn by 2025 Favourable reimbursements for smoking cessation therapy, growing abuse of prescription drugs, and rise in government initiatives to raise awareness about drug addiction are some factors dividing the addiction treatment market from 2017 to 2025

Roman Empire and a major center of the Renaissance, culture on the Italian peninsula has flourished for centuries. Due to its location in the center of the Italian peninsula, Rome is the major railway path for the country. Rome is home to 3 international airports and is well connected with other part of the globe. Metropolitana, the metro system of Rome is the main lifeline of the city. Being a mixture of both ancient and modern culture, the city hosts visiting places like The Colosseum and the Arch of Constantine, Vatican City, The Pantheon etc. and attracts scores of tourists from all around the world.

Source: United Kingdom of Great Britain and Northern Ireland, Office for National Statistics, "Drug misuse: findings from the 2018/19 crime survey for England and Wales", Statistical Bulletin 11/19 (London, July 2019. This statistic show solicit

y by drug type. During this year, a low estimate of 0.96 percent of the world's population use drugs.

North America accounted for a substantial share of the global cardiovascular drugs market in 2019. This is due to rise in the number of smokers in the U.S has increased concerns regarding health risks for both smokers and passive smokers. The market in Asia Pacific is projected to gain market share during the forecast period and is likely to generate considerable revenue in the near future. Initiatives by local governments to attain self-sufficiency in manufacturing pharmaceuticals and incentives for the production of generics in countries such as Brazil, South Africa, and Saudi Arabia are likely to boost the market in Latin America and Middle East & Africa

Importance & Scope:

Drug consumption all over the world has become one of the biggest concerns of our country right now since it is affecting the youth and the children. In a report submitted by the National Drug Dependence Treatment Centre (NDDTC) of the All India Institute of Medical Sciences (AIIMS) in February 2019, it was found that about 14.6 percent of the people (approx. 16 crore people) between the ages 10 and 75 are alcohol user and about 2.8 percent (approx. 3.1 crore people) use cannabis products. According to a report by The First Post, there are about 8.5 lakh people who inject drugs, nationally. These stats are really horrifying because drug use all over the world has gone up rapidly in the past few years. USA, France, Italy U.K are countries of the states that have a high prevalence of drug abuse and disorders, according to reports.

Re habitation centers:

Rehabilitation involves identification of a person's problems and needs, relating the problems to relevant factors of the person and the environment, defining rehabilitation goals, planning and implementing the measures, and assessing the effects (see figure below). Educating people with disabilities is essential for developing knowledge and skills for self-help, care, management, and decision-making. People with disabilities and their families experience better health and functioning when they are partners in rehabilitation Rehabilitation reduces the impact of a broad range of health conditions. Typically rehabilitation occurs for a specific period of time, but can involve single or multiple interventions delivered by an individual or a team of rehabilitation workers, and can be needed from the acute or initial phase immediately following recognition of a health condition through to post-acute and maintenance phases.

S Scope of Addiction Rehab: the Scope of Practice Statement identifies knowledge and skills required for the provision of effective rehabilitation counseling services to persons with physical, mental, developmental, cognitive, and emotional

disabilities as embodied in the standards of the profession's credentialing organizations

Target Audience: Addiction congress target Psychologists, Neurologists, researchers, Therapists, counselors, Rehabilitation therapists, physiotherapists as speakers we also invite exhibitors to exhibit the products and services from commercial and non-commercial organizations like Drug manufactures, Clinical Trial Sites, Management Consultants, Chemists, Pharmacists, Business delegates and Equipment Manufacturers.
