

Announcement: International conference on Advanced Material and Nano Materials

International conference on Advanced Material and Nano Materials cordially welcomes the global audience to participate in the conference which is going to be held in July 23-24, 2021 at Dubai, UAE. The purpose of this conference is to provide an international technical forum to showcase recent advances in microfluidics, bioMEMS, and medical microsystems. Microfluidic devices and systems have created a tremendous interest in many application fields, including life sciences, point of care diagnostics, and environmental applications. The conference aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Microfluidics and its development. There is an extensive international perspective at this conference with speakers, poster presenters, sponsors, and exhibitors from Europe, US, and Asia/Pacific.

Advance materials 2021 will bring together microfluidics scientists and Nano-system people to showcase the newest developments and discuss future directions in microfluidic technologies and their applications in complex systems, broadly defined. The topics will be wide-ranging, including chemical synthesis, separations, advanced man-

ufacturing approaches, energy and the environment, multiphase and colloidal systems, systems biology, synthetic biology, biophysics, organs-on-a-chip, and precision medicine. Some important microfluidics applications have been plotted so as to give a thought on how this new science can both assist and lift look into fields like science and prescription. In any case, there is a ton of space for enhancements so as to spread more microfluidics applications past research simply.

Our goal is to bring together bright minds to give talks that are idea-focused, and on a wide range of subjects, to foster learning, inspiration and wonder – and provoke conversations that matter. Based on your expertise, we welcome you to participate at the prestigious event as a Plenary Speaker. We have developed a global platform for the eminent scientific professionals, students and industry delegates universally to present their newest research findings to the global area. We wish you could join us and share your research experience. It would be ideal if you advise us your acknowledgment and accessibility for this forthcoming gathering.
