### Announcement-6<sup>th</sup> International Conference on Microfluidics

Petr Solich

#### Introduction

The 6<sup>th</sup> International Microfluidics Conference welcomes the global audience to participate in the conference which is to be held March 26 - 27, 2021 at Las Vegas, USA. The main theme of the conference is "Microfluidic Research Trends and Techniques". This conference brings together the innovations in microfluidics and brings the key opinion leaders and thought leaders in the field from around the world for two intensive days of scientific presentations, networking as well as engagement with companies developing innovations in tools and technologies in this space. The purpose of Microfluidics 2020 is to provide an international technical forum to showcase recent advances in microfluidics, Bio-MEMS, and medical microsystems. Microfluidics 2021 brings together top researchers and emerging research leaders to spark scientific exchange and create community.

Microfluidics 2021 will bring together microfluidics scientists and Nano-system people to showcase the newest developments and discuss future directions in microfluidic technologies and their applications in complex systems, broadly defined. The topics will be wide-ranging, including chemical synthesis, separations, advanced manufacturing approaches, energy and the environment, multiphase and colloidal systems, systems biology, synthetic biology, biophysics, organs-on-a-chip, and precision medicine. Some important microfluidics applications have been plotted so as to give a thought on how this new science can both assist and lift look into in fields like science and prescription. In any case, there is a ton of space for enhancements so as to spread more microfluidics applications past research simply.

Our goal is to bring together bright minds to give talks that are idea-focused, and on a wide range of subjects, to foster learning, inspiration and wonder – and provoke conversations that matter. Based on your expertise, we welcome you to participate at the prestigious event as a Plenary Speaker. We have developed a global platform for the eminent scientific professionals, students and industry delegates universally to present their newest research findings to the global area. We wish you could join us and share your research experience. It would be ideal if you advise us your acknowledgment and accessibility for this forthcoming gathering.

Microfluidics 2021 gives ample opportunities to meet and connect with nursing professionals from around the world. Our past conference at Las Vegas, USA during May 23-24, 2019 was a huge success, which had many attendees from USA, Canada, Taiwan, UK, France, Germany, Ireland and Italy etc.

#### Advantages of Venue(Las Vegas):

The major attractions in Las Vegas are the casinos and the hotels, although in recent years other new attractions have begun to emerge. Most casinos in the downtown area are located on Fremont Street, with The Stratosphere being one of the exceptions. Fremont East, adjacent to the Fremont Street Experience, was granted variances to allow bars to be closer together, like the Gas lamp Quarter of San Diego, the goal being to attract a different demographic than the Strip attracts.

The centre of the gambling and entertainment industry, however, is located on the Las Vegas Strip, outside the city limits in the surrounding unincorporated communities of Paradise and Winchester in Clark County. The largest and most notable casinos and buildings are located there.

Its main street and focal point is the Strip, just over 4 miles long. This boulevard is home to themed hotels with elaborate displays such as fountains synchronized to music as well as replicas of an Egyptian Pyramid, the Venetian Grand Canal, and the Eiffel Tower.
