

Bi syndrome - Painful Obstruction Syndrome (SOB)

Romana S Franco

São Cristóvão Saúde, Brazil

Abstract

Pain is understood as a consequence of the interruption of biological processes. The normality of these processes depends on the two substances (physiological conceptions) Qi and blood, fundamental for the body's operations, and pain signals its dysfunction. Qi and Blood have been taken to correspond to the functions of the nervous system and the circulatory system, respectively.

Biography

Romana S Franco is an Acupuncturist at São Cristóvão Saúde Group, Master in Biomedical Engineering, and Coordinator of Lato Sensu Postgraduate Studies in Acupuncture at Cruzeiro do Sul University, Diploma of National Academic Merit in Acupuncture and Chinese Medicine, by the World Federation of Chinese Medicine Societies - WFCMS.
