

Can a small nose breath better than a big nose?

Lidia Guimaraes

Hospital Cuf Porto, Portugal

Abstract

Considering that function is a paramount factor of success in functional and aesthetic rhinoplasty, should never be underestimated. Together with a crucial aesthetic balance, several techniques should be applied to improve function. Different noses have different structures, support and proportions.

- Why is this nose obstructed?
- Framing of techniques.
- What has better results? What's new?
- Examples, photos /small videos.
