Conference Announcement

Carcinogenic cells can attack and obliterate sound tissues and organs. An inquiry which is constantly raised whenever cancer is examined is the manner by which to anticipate and identify priorities. There are generally most 200 distinct sorts of Cancers each requires explicit methodologies for treatment. Cancer Research is an enormous field, understanding the causes, to whom and why it occurs and how to dispose of it. Cancer has consistently been a perplexing inquiry, and there are no basic answers up until now. It is imperative to talk about and examine disease, however much as could be expected. It tends to be fathomed distinctly by the aggregate methodology.

Scientists are coming out with Innovative information and investigate approaches in the field of Cancer.

Lexis Conferences invites all the participants from all over the world to attend “[World Conference on Cancer Biology, Immuno Oncology & Drug Discovery](#)” during October 16-17, 2020 in **San Francisco, California, USA**.

CBIOD 2020 is an 2 day event with Multiple panels, Workshops, Affinity group lunches, Forums, Poster sessions. Our aim is to bring together the brightest minds of all Academicians, Clinical
