

Determinants of household food insecurity among smallholder farmers in ilu Galan district, Oromia region, Ethiopia

Belachew Dessalegn

Madda Walabu University, Ethiopia

Abstract

This research endeavour aims at focussing on Total Quality Management techniques to address a significantly fulcrum-oriented aspect of Food processing, namely Food Fortification. This ethos has been chosen as the focal point of the research as it is extremely relevant in the backdrop of the Global Pandemic. The need of the hour is to make available a spectrum of locally grown, accessible and native dietary inclusions from the Indian diet, to attain, retain and maintain Holistic Wellness in the populace. The perspective and mind-set are Universally relevant due to many factors. They are designed to benefit paediatric to geriatric subjects. They are biochemically nodal in generating a quantum enhancement in immune profile of the subject and furthermore, the research can be extrapolated to commercial, large-scale and entrepreneurial dimensions.

Biography:

Belachew Dessalegn is an Academician, Head of The Department, Consultant, Trainer, Research Guide And Researcher in Biochemistry And Food Science And Quality Control and her qualifications are M.Sc, PhD, F.S.Sc., MASFFBC, CME .

Speaker Publications:

1. Effect of vitamin D and calcium supplementations on reducing the incidence of hypocalcemia after thyroidectomy. World Journal of Medical Sciences 15(2):69-75. ISSN 1817-3055.
