Professor, Health Affairs Department, Dubai Health Authority, UAE, E-mail: hussainh569@gmail.com

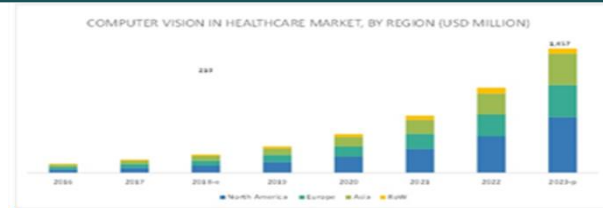

Health services research is the multidisciplinary field of scientific investigation that studies how social factors, financing systems, organizational structures and processes, health technologies, and personal behaviors affect access to health care, the quality and cost of health care, and ultimately our health and well-being. Global health care expenditures are expected to continue to rise as spending is projected to increase at an annual rate of 5.4 percent between 2017-2022, from USD \$7.724 trillion to USD \$10.059 trillion. Market Will Grow at a CAGR of Around 8.5%.

The computer vision in healthcare market is projected to reach USD 1,457 million by 2023 from USD 210 million in 2018, at a CAGR of 47.2% during the forecast period. Factors such as the increasing demand for computer vision systems in the healthcare industry, government initiatives to increase the adoption of AI-based technologies, big data in healthcare, and the use of computer vision in precision medicine are expected to drive the growth of this market.

Global clinical research workflow solutions market is projected to reach USD 12.1 billion by 2023 from USD 6.8 billion in 2018, at a CAGR of 12.4%. The growth of this market is mainly driven by the increase in need to curtail healthcare costs and the increasing patient volume due to the rising prevalence of chronic diseases. Also, the advantages of clinical workflow solutions in enhancing patient care and safety along with the government initiatives for HCIT adoption are escalating the market growth.

Medical imaging workstations market is estimated to grow at a CAGR of 8.9% to reach USD 1,377 million by 2023 from USD 897 million in 2018. Factors such as the rising global burden of target diseases, increased product commercialization, rising public-private investments to support product development, evolving user preference for digital platforms, and the establishment of new medical facilities are driving the growth of the global market.

Europe healthcare IT market was valued at USD14.43 billion in 2016, and is forecast to grow at a CAGR of 7.63%, in value terms, during 2017-2022, to reach USD22.87 billion by 2022, on the back of growing demand for patient safety and data accuracy, increasing patient population base and increasing spending in healthcare industry. Growth in Europe healthcare IT services market can also be attributed to rising demand for health and wellness monitoring, and applications such as healthcare analytics and fraud management. Increasing need to reduce healthcare costs, growing need to reduce paperwork and unproductive idle time, and increasing demand for easy access to affordable care are also anticipated to drive healthcare IT services market in the region through 2022.
