

# International Summit on International Conference on Automation and Artificial Intelligence

Dr. Yousef Daradkeh\*

### Abstract

Artificial Intelligence webinar: it is our great pleasure to invite you to participate in the international conference on automation and artificial intelligence which is an online webinar which will take place during 21-22 may 2020. The dedicated webinar theme is: innovations and advancements in automation and artificial intelligence. The webinar will provide a platform to share new ideas relating to recent developments in artificial intelligence. Automation engineering scientists and researchers will come to know about more information regarding their research subjects and will be able to establish their view at a global level. Let's join hands for the future of this world, for the next-gen of mankind, for the prospective and collective efforts to change what is within our reach and means. Our collaborative efforts have the power to change the destiny of those tiny little kids who look up to us, pediatricians, neonatologists, nutritionists, dieticians and all of us who deal and interact with children.

The webinar sessions includes: artificial intelligence, information and communications technology, computer and information science, automation, automation tools and its applications, machine learning, robotics, human robot interaction, artificial neural networks, deep learning, big data to ai, role of ai in industry, enterprise artificial intelligence, artificial intelligence in block chain technology, ethics of artificial intelligence, artificial intelligence in healthcare, artificial insight for business, future scope of ai, how robot completely changes us, robotics in industry, role of automation in robotics, cutting-edge artificial intelligence, artificial intelligence in law, artificial intelligence in multimedia technologies.

Our organizing committee includes renowned scientists, researchers and experts in the fields such as Dr. Yung-yao chen, associate professor, national taipei university of technology (ntut) taiwan, Dr. Marios sophocleous, research fellow, university of cyprus, cyprus; Dr. Tayfun dede, professor, karadeniz technical university, turkey; Dr. yousef daradkeh, dsc, phd., p.eng., prince sattam bin

abdulaziz university, ksa, saudi arabia. By seeking suggestions from our committee members artificial intelligence 2020 webinar is been designed with 15 sessions which comprises of all topics in the field of automation and artificial intelligence. All the submission towards artificial intelligence webinar are rigorously peer reviewed to ensure to accept high quality submissions by the committee members who are well experienced in their field and from various countries around the globe.

If you are looking for a global exposure for your novel research ideas and services, then this webinar would be the right place for you. As we are one of the world's leading specialist in organizing scientific conferences, workshops, symposia and exhibitions internationally in different fields like medical, pharma, engineering, science, technology and business attracting more than 25 million+ visitors, 25000+ unique visitors per conference and 70000+ page views for every individual conference would help in quantifying our presenters research and biography visibility to the online communities and get recognized worldwide. As we're seeing the impact of covid-19 (coronavirus) across healthcare globally. In this webinar various eminent personalities will be sharing their clinical expertise, and professional insights about covid-19 as well as about artificial intelligence research to provide you with recommendations to optimally manage the artificial intelligence webinar of these automation experts.

Benefits for the webinar attendees are as follows:

- International speaker certification
- Hard copy of conference souvenir, id card and certificate will be sent to your address
- Online publication of the abstract in the conference website
- Abstract publication in the conference proceeding with the unique doi given
- Exclusive speaker pages in relation with the conference website for registered speakers and organizing committee members
- Special publication discount benefits as a conference attendee
- Group registration discounts
- Outstanding young researcher award
- Nominations for best poster award
- International networking
- Scientific association, collaboration and many more...!
