

Journal of Nanomaterials & Molecular Nanotechnology Welcomes to Participate as an Editor

Adina Campbell*

Announcement

First and foremost, we'd want to express our heartfelt gratitude to the Open Access Journal's editors. The Journal of Nanomaterials and Molecular Nanotechnology works with over 50 distinguished editors and publishes high-quality articles in the field of Nanoscience and Nanotechnology which includes topics such as Nanomaterials, Types, Design, Synthesis & Characterization of Nanostructured Materials, Current Research Advancements, Potential applications of Nanomaterials/Nanotechnology, Global Market, Molecular Nanotechnology, Nanodevices and Nanosensors, Nanoelectronics, Nanomedicine, Nanofabrication Techniques, Nanotoxicity, Nanobiotechnology, Pharmaceutical Nanotechnology, Commercial Aspects-Nanotechnology Market, etc. We use an Editorial Tracking System, an online manuscript submission, review, and tracking system, to ensure excellence in the peer-review process. The review procedure is carried out by members of the Journal's editorial board or external specialists; any citable manuscript must receive the approval of at least two independent reviewers, followed by editor approval. Authors can submit submissions and keep track of

our board members' invaluable contributions to both our complete companion audit structure and the Journal's crucial progress. Global experts in linked logical distributions make up the Journal group. To ensure distribution quality, all submitted papers pass through various steps. Authors can submit submissions and keep track of our board members' invaluable contributions to both our complete companion audit structure and the Journal's crucial progress. Global experts in linked logical distributions make up the Journal group. All submitted papers go through several steps to ensure distribution quality. Due to COVID19 pandemic several researchers and technicians are still coping with issues such as laboratory closures and online instruction while also dealing with the effects of the pandemic scenario on their daily lives. Some of the editors, reviewers, and authors of a variety of periodicals are also doctors fighting the pandemic. As a result, delays are unavoidable during this pandemic, and we would want to express our gratitude. It is critical that our Editors and Editorial Advisory Board address the themes we distribute and reflect the countries from which our submissions are submitted. Furthermore, the Journal of Nanomaterials & Molecular nanotechnology has aided early-career scholars.

Researchers/Scientists/Authors are welcome to submit their CVs and research interests to join the Editorial Board, where they can collaborate closely with the Editors and Reviewers to ensure a high-quality and timely review process. Please give us your current C.V., research interests, biography, and recent photograph (JPG) if you are interested in joining our Editorial Board at Email: nanotech@scholarres.org. Researchers/Scientists/Authors are welcome to submit their CVs and areas of research interest to join the Editorial Board, where they can collaborate closely with the Editors and Reviewers to deliver the same high quality and timely service.
