

2020 Conference Announcement

## Marine Science Strategic Research and Innovations

**Ajah Uzoigwe James**

*President, Earth Environment And Climate Care Ambassadors ,Nigeria., E-mail: citycleanersinternational@gmail.com*

The International Conference on 6th International conference on Marine Science, Coastal Dynamics and Management hosted by Conference series with the theme, "Influencing issues in marine life" was successfully executed during September 21-22, 2018 in Dallas, USA. The conference offered a unique opportunity to investigators across the globe in order to meet, explore, network and perceive new scientific innovations. The conference received a commendable applaud and active participation was received from the Editorial Board Members of OMICS Group Journals as well as from the global scientists, Professors, Academicians, Researcher Scholars and students from diverse field of Marine Science and Oceanography . Marine biology is very important for our wellbeing. Ocean supports the basic need of human beings in several ways. Using advanced technologies, marine biology helps us to improve our food deriving ability, water disposal, energy sources, and transportation using oceans.

The conference commenced with the presence of worthy Keynote forum and among the notable ones, few are listed below.

- Re-establishing sustainable coastal protection by mimicking natural processes

Anne Marie Clements, Anne Clements and Associates, Australia

- Ocean research institutional model for the emerging sector: West Africa's subsea support sector, Chinedum Onyemechi, Federal University of Technology Owerri, Nigeria

Conference series is organizing "Global Summit on Marine Science and Oceanography" which is going to be held on November 02-03, 2020 at Sydney, Australia. The conference is going to cover the entire field related to Marine Science and Oceanography, latest research and findings. The Conference will provide a platform where research scholars and students will be able to gain knowledge about new, innovative research and findings from the eminent Scientist, Researchers and Professors. Marine Science Conf 2020 is providing an international platform to talk about and learn about Oceanography, Marine Sciences, Marine Biology, and Marine Geology, Marine ecology to change their knowledge, experience and research innovations. The aim of Marine Science Conf 2020 Conference is to create a platform for strong exchange of the latest advancement and applied sciences in the direction of Marine Life.

The conference highlights of Marine Science Conf 2020 are as follows:

Deep Sea Mining, Marine Pollution, Marine Natural Products Chemistry, Marine Chemical Biology, Marine Geology, Ocean Biogeochemistry, Marine Engineering and Technology, Colored dissolved organic matter, Molecular Bi

Biology, Biotechnology and Marine Toxicology, Marine Biology, Coastal Ecology, Brackish Water, Fisheries Biology and Management, Marine heavy metals poisoning marine toxicology, Ocean acidification, Marine Nutrients, Marine Chemistry.
