[Dermatology](#) is a department of drugs focused on the diagnosis and treatment of diseases of the skin, nails, hair, and mucous membranes. The major skin diseases encompass dermatitis, acne, psoriasis, eczema, skin infections, and pores and skin most cancers. Hair loss is the maximum commonplace hair problems around the world. Bacterial and fungal infections in nails, ingrown nails, tumor and warts are some commonplace nail problems. So that you can treat the pores and skin, nail and hair sicknesses, dermatologists propose dermatology capsules for his or her management.

Dermatology is the branch of science which offers treatment for diseases of hair, nails and skin. The ailments related to them are termed as dermatological diseases. A dermatologist treats illnesses, in the widest sense, and a few beauty issues of the dermis. Acne is an expanded day and age epidermis described by ranges of clogged pores, whiteheads, skin inflammation, oily dermis, and conceivably scarring. Skin cancer and malignancy of epithelial cells, Contact dermatitis, Psoriasis, Rosacea, Cellulitis, Viral skin diseases. Dermatological problems are either intrinsic abnormalities or derangement of normal processes related to skin hair and nail.

Dermatological conditions are one of the most common types of disorders worldwide, and approximately one-third of the US population suffers from at least one active skin condition. For the past decades, the majority of the dermatology market has remained saturated with established products. However, the clinical and commercial success of biologics in the treatment of psoriasis, as well as advancements in the understanding of the disease pathways of many dermatological conditions, have led to a renewed interest from pharmaceutical companies in the dermatology market, and subsequently the emergence of an innovative pipeline.

This report covers all dermatological disorders, but there is a particular focus on three key diseases: atopic dermatitis, acne vulgaris and psoriasis, as these conditions have the highest prevalence and the largest

pipeline. The global dermatology market was valued at \$20.0 billion in 2015, and is projected to grow at a considerable Compound Annual Growth Rate (CAGR) of 7.73%, reaching \$33.7 billion in 2022. Key drivers of this growth will be the uptake of recently approved premium biologics, as well as promising late-stage products that are expected to be highly valuable.

North America and Europe are the main markets, because of the increasing incidence of pores and skin illnesses, and increasing focus approximately capacity packages of dermatology capsules within the areas. The U.S., followed by way of Canada, is the biggest marketplace for dermatology drugs. UK, Germany and France are the principal countries maintaining a substantial proportion within the EU marketplace.

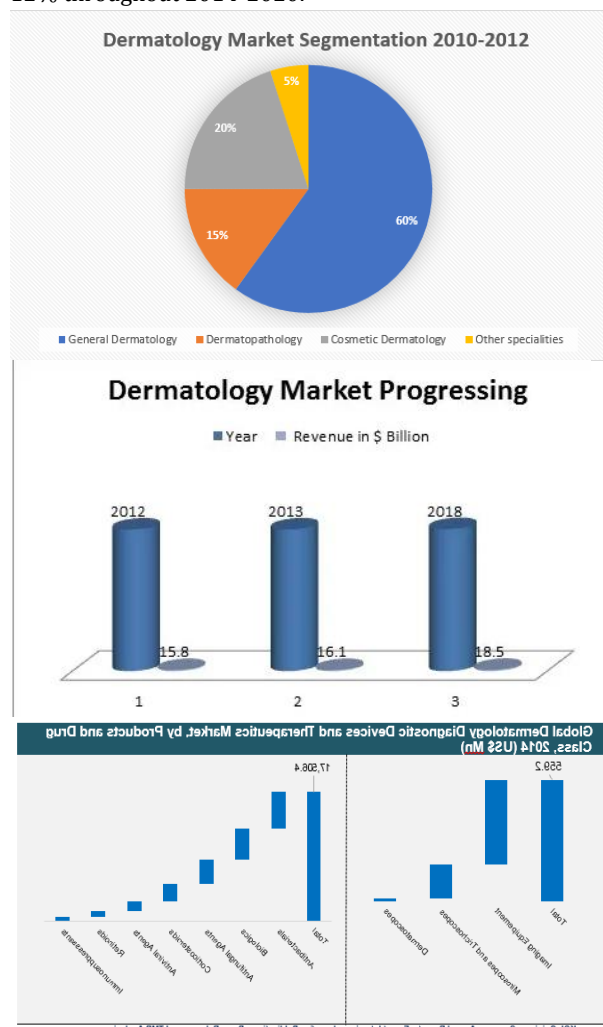

This document chiefly analyses prescribed drugs used within the management of skin sicknesses. Pores and skin conditions are the various maximum common fitness problems amongst most countrywide populations, together exceeding the superiority of conditions which include obesity, hypertension and cancer. The massive prices of skin illnesses encompass doctor visits, health center care, prescribed drugs and over-the-counter merchandise for treating or coping with these situations, in addition to oblique expenses due to productivity losses.

The global marketplace for pores and skin disease treatment technology, which reached \$17.1 billion in 2015, need to attain \$20.4 billion in 2020, demonstrating a five-12 months compound annual growth fee (CAGR) of three.6%. The United States market for skin sickness treatment, which dominates the worldwide market at some point of the period, totaled \$7.5 billion in 2015 and should reach \$8.6 billion in 2020, reflecting a 5-yr CAGR of 2.6%. BRIC (Brazil, Russia, India, China), the quickest developing vicinity of the worldwide dermatology market with a 5-year CAGR of 6%, should total greater than \$4.6 billion with the aid of 2020.

Asia-Pacific marketplace evaluation

The Asian marketplace is growing with a sizeable price, owing to the increasing occurrence of skin illnesses, developing geriatric populace, and increasing healthcare spending in the place. Further, tasks taken by means of diverse government associations to elevate focus approximately [dermatological](#) issues and its management are also helping the growth of the Asian dermatology drug marketplace. The international locations, which include India, Japan and China are the main markets inside the region. In line with a new

research report by way of RNCOS entitled, “worldwide [Dermatology](#) device marketplace Outlook 2020”, Asia has been witnessing better boom in the skin care devices enterprise across global, backed by factors along with growing recognition of cosmetic strategies and skin issues some of the populace of Asian place. The worldwide dermatology gadgets market generates about US\$ 6.8 Billion in 2014 and expected to develop at CAGR 12% throughout 2014-2020.

Target Audience:

- Scientists
- Directors
- Entrepreneurs
- Professors
- Doctors
- Surgeons
- Business delegates
- Community Members
- Students from Academia involved in research of Dermatology and related fields.
- Dermatologists in training and healthcare professionals
- Cosmetics companies and Clinics

- Skincare institutions

Related Companies/Industries:

- Sand Lake Dermatology Center
- Agabang & Company
- SkinKind Limited
- Regeneron Pharmaceuticals, Inc.
- Dermal Life
- Dermatology Alliance, Patch Testing Centers of Excellence
- Dermatology Associates of Concord
- Galderma
- Johnson & Johnson
- AbbVie
- GSK
- Pfizer
- LEO Pharma
- Apothecus Pharmaceutical Corp
- Remedi Pharmaceuticals
- Abgenix, Inc.
- Abbott Laboratories
- Acadia Pharmaceuticals
- Active Pass Pharmaceuticals
- Advanced Drug Delivery Technologies AG

Related Associations and Societies:

- American Academy of Dermatology
- American Board of Dermatology
- Australian Dermatopathology Society
- Australian Society for Dermatology Research
