### Editorial Note

Medication use issue, fortifying limit on psychological wellness and substance misuse strategies.

Medication use issue substance or medication misuse and enslavement, tranquilize use issue, likewise called substance use or synthetic use issue, is a sickness described by a dangerous example of utilizing a substance that prompts noteworthy issues or misery, including resilience to or withdrawal from the substance, just as different issues that utilization of the substance can cause for the victim, either socially or as far as their work or school execution. The impacts of medication use issues on society are considerable.

Journal of Addictive, Behavior Therapy and Rehabilitation offers true thanks to all its tip top board of article board individuals for their persistent endeavors, important help and consolation all through the distribution excursion of the diary, directly from its origin in the year 2015 and salutes them for causing the diary to distribute nature of exploration and turning out to be as one of the main and very much perceived supporter of logical results in the field of studies identified with discoveries improvements from fortifying strategies and frameworks for mental.

Journal of Addictive, Behavior Therapy and Rehabilitation is expecting to distribute cultivate exercises in the field of medication misuse and the weight related with mental, neurological and substance use issues, and to advance emotional well-being around the world.

The target of JABTR is to distribute great unique examination papers, contextual analyses, stories, survey articles, short correspondence, clinical information, epidemiologic investigations, theory, and significant and sagacious audits. Consistently we distributed with various volumes and various issues. Each issue of the diary secured with various sorts of subjects in the field of psychological wellness, neurological and substance misuse issues and administration frameworks; proof put together specialized direction with respect to emotional wellness and substance misuse; fortifying strategies and frameworks for mental, neurological and substance misuse care; reinforcing limit on emotional well-being and substance misuse approaches and frameworks to convey administrations that are viable, satisfactory and regard the human privileges of influenced people, and react to developing psychological well-being issues, for example, crises and HIV/AIDS. Every single distributed paper is dependent upon the Journal's twofold visually impaired survey process. The current volume of the diary is 9 with issue 3.

Journal of Addictive Behavior Therapy and Rehabilitation has one of the quickest turnaround times of any clinical diary on the planet. By

and large, peer audit is finished inside 2-3 weeks and the proofreader's choice inside 2-7 days of this. It is in this way uncommon to need to stand by over about a month for an ultimate conclusion. The submitted papers will be a 21-day quick audit process with global friend survey principles. The timeline of handling from submission to publication is 45 days. The original copy will be distributed inside 7 days of acknowledgment. The timeline of preparing from submission to publication is 45 days. The composition will be distributed inside 7 days of acknowledgment. There is a decent individual underneath any enslavement, who simply needs an opportunity to manage their dependence on their own terms. Tragically, individuals will in general separation themselves from addicts. That social separation makes it considerably harder for individuals with addictions to deal with their substantial weight. Right when individuals with addictions need additional help, they have less help than they at any point had previously.

### The Journal Classifications are as Follows:

- Drug addiction
