### Microbiology 2018 Conference Report

**Shane Fitch**

CEO, Lovexair Foundation, Spain, E-mail: [presidencia@lovexair.com](mailto:presidencia@lovexair.com)

Microbiology Congress 2018 was held during **June 28-29, 2018 at Amsterdam, Netherlands**. The conference was delightful and knowledgeable with the support and guidance of Editorial Board members of supporting Conference Series Journals, scientists, young and brilliant researchers and talented student communities representing different countries, who made this conference productive. They explored their research work with the eminent personalities and found the concept and theme of the conference very interesting. The wide range of topics gave attendees the chance to learn about every aspect of microbiology.

**Microbiology Congress 2018** was based on the theme "Current Advances & Innovative Research of Bio-Sciences" which included the following scientific tracks:

- Aquaculture & Marine Biotechnology
- Agricultural Biotechnology
- Medical Biotechnology
- Industrial Biotechnology
- Pure Microbiology: Structures, Functions
- Medical Microbiology
- Pharmaceutical Microbiology
- Industrial Microbiology
- Microbial Biotechnology
- Food Microbiology
- Agricultural Microbiology
- Veterinary Microbiology
- Environmental Microbiology
- Water Microbiology

We are grateful to our Organizing Committee Members for their generous support and suggestions for the conference and the conference proceeded through various Scientific Sessions and plenary lectures.

Speakers related to various fields like bacteriology, virology, microbiology, immunology, pathology etc have attended the conference and explored their research work in the respective fields. The conference proceeded through various Scientific Sessions and comprehensive lectures, of which few are listed below:

- Bioprospecting of microbial symbionts from Indonesian reef ecosystems, Ocky Karna Radjasa, Diponegoro University, Indonesia
- Periodontal pathogens are a risk factor of oral cavity squamous cell carcinoma, independent of tobacco and alcohol and human Papillomavirus, Zhiheng Pei, New York University School of Medicine, USA

- In situ capture of RT-qPCR (ISC-RT-qPCR) method for detection of human norovirus in food and environmental samples, Peng Tian, United States Department of Agriculture, USA

Conference Series has taken the privilege of felicitating Microbiology 2018 Organizing Committee Members, Keynote Speakers and Speakers who had supported for the success of this event.

We are also obliged to various delegate experts, company representatives and other eminent personalities who supported the conference and the Keynote speakers, researchers and delegates shared their innovative research and experience through their presentations at **Microbiology Congress 2018** and we are glad to inform that all accepted abstracts for the conference have been published in the respective journal.

We heartily congratulate the participants of the poster presentation and Young Research Forum. Also, we appreciate all the participants who put their efforts in the conference and sincerely wish them success in future endeavors. We are glad to inform that all accepted abstracts for the conference are published in the respective International Journal as a special issue.

With the positive feedback from the conference, Conference Series would like to announce the commencement of the "3rd World Congress on Microbiology and Clinical research" which is being organized during **October 08-09, 2020 at Milan, Italy**.

We see this event as opportunity for bringing together a unique national and international mix of scientists and experts coming from various universities, research institutions and industries. The theme of Microbiology Expo 2020 is "Novel Insights and Advanced Technology in the field of Microbiology".
